

# STATISTICAL NOTES

According to the WTO Task Force on Aid for Trade, projects and programmes are part of aid for trade if these activities have been identified as trade related development priorities in the partner country's national development strategies. Furthermore, the WTO Task Force concluded that to measure aid for trade flows the following categories should be included:

- a) Technical assistance for trade policy and regulations: for example, helping countries to develop trade strategies, negotiate trade agreements, and implement their outcomes;
- b) Trade-related infrastructure: for example, building roads, ports, and telecommunications networks to connect domestic markets to the global economy;
- c) Productive capacity building (including trade development): for example, supporting the private sector to exploit their comparative advantages and diversify their exports;
- d) Trade-related adjustment: helping developing countries with the costs associated with trade liberalisation, such as tariff reductions, preference erosion, or declining terms of trade; and,
- e) Other trade-related needs: if identified as trade-related development priorities in partner countries' national development strategies.

The OECD DAC aid activity database (CRS) – a database covering around 90% of all ODA - is recognised as the best available data source for tracking global aid-for-trade flows. The CRS was established in 1967 and collects information on official development assistance (ODA) and other official flows (OOF) to developing countries. It is the internationally recognised source of data on aid activities (geographical and sectoral breakdowns) and is widely used by governments, organisations and researchers active in the field of development. For the OECD, the CRS serves as a tool for monitoring specific policy issues, including aid for trade. The CRS enables the tracking of aid commitments and disbursements, and provides comparable data over time and across countries. The use of this existing database led to significant savings of time and resources to effectively track aid-for-trade flows. The policy and guidelines for CRS reporting are approved by DAC members as represented at the DAC Working Party on Statistics (WP-STAT). The OECD collects, collates and verifies the consistency of the data, and maintains the database.

It should be kept in mind that the CRS does not provide data that match exactly all of the above aid-for-trade categories. In fact, the CRS provides proxies under four headings:

- **Trade policy and regulations.** In the CRS, five purpose codes are used to cover trade policy and regulations activities. These five sub-categories are: trade policy and administrative management; trade facilitation; regional trade agreements; multilateral trade negotiations; and trade education/training.
- **Economic infrastructure.** Amounts relating to trade-related infrastructure are provided in the CRS by data under the heading "Economic Infrastructure and Services" and cover the sectors transport and storage, communications and energy generation and supply.
- **Building Productive capacity (BPC), including trade development.** The CRS captures full data on all activities in the productive and services sectors, such as agriculture; industry; mineral resources and mining; business; and banking. Trade development activities are identified through the *Trade Development policy marker* and have been separately identified in the CRS data collection since

2007 flows. These activities are an "of which" of *Building productive capacity* and are scored as either principally or significantly contributing to trade development. However, at time of reporting, some donors may have difficulty in identifying aid activities that have a defined trade component. This may reflect upon the accuracy of these data and, as such, amounts shown under trade development can only at best be used as approximations.

- **Trade-related adjustment.** Was introduced in the CRS as a separate data item in 2007 to track flows corresponding to trade-related adjustment. This category identifies contributions to developing country budgets to assist the implementation of trade reforms and adjustments to trade policy measures by other countries, and alleviate shortfalls in balance-of-payments due to changes in the world trading environment.

The CRS covers all ODA, but only those activities reported under the above four categories can be identified as aid for trade. It is not possible to distinguish activities in the context of '*Other trade-related needs*'. To estimate the volume of such 'other' activities, it would be necessary to examine aid projects in sectors other than those considered so far – for example in health and education – and indicate what share, if any, of these activities have an important trade component. A health programme, for instance, might permit increased trade from localities where the disease burden was previously a constraint on trade. Consequently, accurate monitoring of aid for trade would require comparison of the CRS data with providers and partner countries' self-assessments of their aid for trade.

## FOOTNOTES TO TABLES IN ANNEX A

Most of the data shown in Annex A are sourced from the CRS. To view the full set of CRS data please visit: [www.oecd.org/dac/stats/idsonline](http://www.oecd.org/dac/stats/idsonline)

### Providers of aid for trade and trade-related other official flows:

The list of aid providers is split into DAC member countries, other bilateral donors and multilateral organisations. The full names of organisations are listed under the Acronyms section.

**Korea** became a member of the DAC in 2010 and was joined in 2013 by the Czech Republic, Iceland, Poland, the Slovak Republic and Slovenia. Data shown in previous years for these countries may be partial. Data collected from the EIF, FAO, IMF, ITC UNESCAP, UNESCWA, UNIDO, WTO and Turkey comprise specialised reporting as from 2007 on Aid for Trade flows and may not constitute the totality of their individual aid funding.

The **Inter-American Development Bank (IDB)** changed its reporting methodology to the CRS as from 2009 flows.

"**Other multilateral donors**" include small amounts from several multilateral agencies (GGGI, AITIC, Nordic Development Fund, UNPBF, UNICEF).

### Aid recipients:

The DAC List of ODA Recipients represents all countries and territories eligible to receive official development assistance (ODA). These ODA-eligible recipients consist of low and middle income countries based on gross national income (GNI) per capita as published by the World Bank, with the exception of G8 members, EU members, and countries with a firm date for entry into the EU. The low-income countries include the Least Developed Countries (LDCs) as defined by the United Nations.

In the latest revision of the list, effective from 1 January 2015 for reporting on 2014, 2015 and 2016 flows, there remains a total of 146 ODA-eligible countries (52 low-income countries of which 48 least developed, 36 lower middle-income and 58 upper middle-income). The next review of the DAC List will take place in 2017.

See the Annexes to view the DAC List of Aid Recipients by income group and region. A full historic of graduations to and from the DAC List can be viewed at: <http://www.oecd.org/dac/stats/daclist.htm>

### **Channels of delivery:**

The list shown in Table A.11 represents major headings for channels of delivery in the CRS. The full list under each category (updated in 6 July 2016), is accessible at: <http://www.oecd.org/dac/stats/annex2.htm>. The category "Other" represents channels of delivery such as: Universities, colleges, or other teaching institutions, research institutes or think-tanks.

### **Sector allocable aid:**

As from 2010 the method used to calculate sector allocable aid has changed. In order to measure donors' intention, the calculation is now based on types of aid. This allows the inclusion of unpredictable aid that has a specific policy. For example, humanitarian aid is unpredictable but allows practices targeting gender equality. Aid where the donor has no control on the spending has been removed such as sector budget support and core support to NGOs.

### **Legend:**

".." denotes zero.

0.0 denotes amounts of less than USD 0.5 million.

0.0% denotes a percentage of less than 0.5%

21040	Water transport	Harbours and docks, harbour guidance systems, ships and boats; river and other inland water transport, inland barges and vessels.
21050	Air transport	Airports, airport guidance systems, aeroplanes, aeroplane maintenance equipment.
21061	Storage	Whether or not related to transportation.
21081	Education and training in transport and storage	
<b>COMMUNICATIONS</b>		
22010	Communications policy and administrative management	Communications sector policy, planning and programmes; institution capacity building and advice; including postal services development; unspecified communications activities.
22020	Telecommunications	Telephone networks, telecommunication satellites, earth stations.
22030	Radio/television/print media	Radio and TV links, equipment; newspapers; printing and publishing.
22040	Information and communication technology (ICT)	Computer hardware and software; internet access; IT training. When sector cannot be specified.
<b>ENERGY GENERATION AND SUPPLY</b>		
23110	Energy policy and administrative management	Energy sector policy, planning; aid to energy ministries; institution capacity building and advice; unspecified energy activities.
23111	Energy sector policy, planning and administration	
23112	Energy regulation	Regulation of the energy sector, including wholesale and retail electricity provision.
23181	Energy education/training	All levels of training not included elsewhere.
23182	Energy research	Including general inventories, surveys.
23183	Energy conservation and demand-side efficiency	All projects in support of energy demand reduction, e.g. building and industry upgrades, smart grids, metering and tariffs. Also includes efficient cook-stoves and biogas projects.
23210	Energy generation, renewable sources - multiple technologies	Renewable energy generation programmes that cannot be attributed to one single technology (codes 23220 through 23280 below). Fuelwood/charcoal production should be included under forestry 31261.
23220	Hydro-electric power plants	Including energy generating river barges.
23230	Solar energy	Including photo-voltaic cells, solar thermal applications and solar heating.
23240	Wind energy	Wind energy for water lifting and electric power generation.
23250	Marine energy	Including ocean thermal energy conversion, tidal and wave power.
23260	Geothermal energy	Use of geothermal energy for generating electric power or directly as heat for agriculture, etc.

23270	Biofuel-fired power plants	Use of solids and liquids produced from biomass for direct power generation. Also includes biogases from anaerobic fermentation (e.g. landfill gas, sewage sludge gas, fermentation of energy crops and manure) and thermal processes (also known as syngas); waste-fired power plants making use of biodegradable municipal waste (household waste and waste from companies and public services that resembles household waste, collected at installations specifically designed for their disposal with recovery of combustible liquids, gases or heat). See code 23360 for non-renewable waste-fired power plants.
23310	Energy generation, non-renewable sources, unspecified	Thermal power plants including when energy source cannot be determined; combined gas-coal power plants.
23320	Coal-fired electric power plants	Thermal electric power plants that use coal as the energy source.
23330	Oil-fired electric power plants	Thermal electric power plants that use fuel oil or diesel fuel as the energy source.
23340	Natural gas-fired electric power plants	Electric power plants that are fuelled by natural gas.
23350	Fossil fuel electric power plants with carbon capture and storage (CCS)	Fossil fuel electric power plants employing technologies to capture carbon dioxide emissions. CCS not related to power plants should be included under 41020. CCS activities are not reportable as ODA.
23360	Non-renewable waste-fired electric power plants	Electric power plants that use non-biodegradable industrial and municipal waste as the energy source.
23410	Hybrid energy electric power plants	Electric power plants that make use of both non-renewable and renewable energy sources.
23510	Nuclear energy electric power plants	Including nuclear safety.
23610	Heat plants	Power plants which are designed to produce heat only.
23620	District heating and cooling	Distribution of heat generated in a centralised location, or delivery of chilled water, for residential and commercial heating or cooling purposes.
23630	Electric power transmission and distribution	Grid distribution from power source to end user; transmission lines. Also includes storage of energy to generate power (e.g. pumped hydro, batteries) and the extension of grid access, often to rural areas.
23640	Gas distribution	Delivery for use by ultimate consumer.

**Building productive capacity (the following codes relate to the trade development marker)**

**BANKING AND FINANCIAL SERVICES**

24010	Financial policy and administrative management	Finance sector policy, planning and programmes; institution capacity building and advice; financial markets and systems.
24020	Monetary institutions	Central banks.
24030	Formal sector financial intermediaries	All formal sector financial intermediaries; credit lines; insurance, leasing, venture capital, etc. (except when focused on only one sector).
24040	Informal/semi-formal financial intermediaries	Micro credit, savings and credit co-operatives etc.
24081	Education/training in banking and financial services	

<b>BUSINESS AND OTHER SERVICES</b>		
25010	Business support services and institutions	Support to trade and business associations, chambers of commerce; legal and regulatory reform aimed at improving business and investment climate; private sector institution capacity building and advice; trade information; public-private sector networking including trade fairs; e-commerce. Where sector cannot be specified: general support to private sector enterprises (in particular, use code 32130 for enterprises in the industrial sector).
25020	Privatisation	When sector cannot be specified. Including general state enterprise restructuring or demonopolisation programmes; planning, programming, advice.
<b>AGRICULTURE</b>		
31110	Agricultural policy and administrative management	Agricultural sector policy, planning and programmes; aid to agricultural ministries; institution capacity building and advice; unspecified agriculture.
31120	Agricultural development	Integrated projects; farm development.
31130	Agricultural land resources	Including soil degradation control; soil improvement; drainage of water logged areas; soil desalination; agricultural land surveys; land reclamation; erosion control, desertification control.
31140	Agricultural water resources	Irrigation, reservoirs, hydraulic structures, ground water exploitation for agricultural use.
31150	Agricultural inputs	Supply of seeds, fertilizers, agricultural machinery/equipment.
31161	Food crop production	Including grains (wheat, rice, barley, maize, rye, oats, millet, sorghum); horticulture; vegetables; fruit and berries; other annual and perennial crops. [Use code 32161 for agro-industries.]
31162	Industrial crops/export crops	Including sugar; coffee, cocoa, tea; oil seeds, nuts, kernels; fibre crops; tobacco; rubber. [Use code 32161 for agro-industries.]
31163	Livestock	Animal husbandry; animal feed aid.
31164	Agrarian reform	Including agricultural sector adjustment.
31165	Agricultural alternative development	Projects to reduce illicit drug cultivation through other agricultural marketing and production opportunities (see code 43050 for non-agricultural alternative development).
31166	Agricultural extension	Non-formal training in agriculture.
31181	Agricultural education/training	
31182	Agricultural research	Plant breeding, physiology, genetic resources, ecology, taxonomy, disease control, agricultural bio-technology; including livestock research (animal health, breeding and genetics, nutrition, physiology).
31191	Agricultural services	Marketing policies and organisation; storage and transportation, creation of strategic reserves.
31192	Plant and post-harvest protection and pest control	Including integrated plant protection, biological plant protection activities, supply and management of agrochemicals, supply of pesticides, plant protection policy and legislation.
31193	Agricultural financial services	Financial intermediaries for the agricultural sector including credit schemes; crop insurance.

31194	Agricultural co-operatives	Including farmers' organisations.
31195	Livestock/veterinary services	Animal health and management, genetic resources, feed resources.
31195	Livestock/veterinary services	Animal health and management, genetic resources, feed resources.

**FORESTRY**

31210	Forestry policy and administrative management	Forestry sector policy, planning and programmes; institution capacity building and advice; forest surveys; unspecified forestry and agro-forestry activities.
31220	Forestry development	Afforestation for industrial and rural consumption; exploitation and utilisation; erosion control, desertification control; integrated forestry projects.
31261	Fuelwood/charcoal	Forestry development whose primary purpose is production of fuelwood and charcoal.
31281	Forestry education/training	
31282	Forestry research	Including artificial regeneration, genetic improvement, production methods, fertilizer, harvesting.
31291	Forestry services	

**FISHING**

31310	Fishing policy and administrative management	Fishing sector policy, planning and programmes; institution capacity building and advice; ocean and coastal fishing; marine and freshwater fish surveys and prospecting; fishing boats/equipment; unspecified fishing activities.
31320	Fishery development	Exploitation and utilisation of fisheries; fish stock protection; aquaculture; integrated fishery projects.
31381	Fishery education/training	
31382	Fishery research	Pilot fish culture; marine/freshwater biological research.
31391	Fishery services	Fishing harbours; fish markets; fishery transport and cold storage.

**INDUSTRY**

32110	Industrial policy and administrative management	Industrial sector policy, planning and programmes; institution capacity building and advice; unspecified industrial activities; manufacturing of goods not specified below.
32120	Industrial development	
32130	Small and medium-sized enterprises (SME) development	Direct support to the development of small and medium-sized enterprises in the industrial sector, including accounting, auditing and advisory services.
32140	Cottage industries and handicraft	
32161	Agro-industries	Staple food processing, dairy products, slaughter houses and equipment, meat and fish processing and preserving, oils/fats, sugar refineries, beverages/tobacco, animal feeds production.
32162	Forest industries	Wood production, pulp/paper production.
32163	Textiles, leather and substitutes	Including knitting factories.

32164	Chemicals	Industrial and non-industrial production facilities; includes pesticides production.
32165	Fertilizer plants	
32166	Cement/lime/plaster	
32167	Energy manufacturing	Including gas liquefaction; petroleum refineries.
32168	Pharmaceutical production	Medical equipment/supplies; drugs, medicines, vaccines; hygienic products.
32169	Basic metal industries	Iron and steel, structural metal production.
32170	Non-ferrous metal industries	
32171	Engineering	Manufacturing of electrical and non-electrical machinery, engines/turbines.
32172	Transport equipment industry	Shipbuilding, fishing boats building; railroad equipment; motor vehicles and motor passenger cars; aircraft; navigation/guidance systems.
32182	Technological research and development	Including industrial standards; quality management; metrology; testing; accreditation; certification.

**MINERAL RESOURCES AND MINING**

32210	Mineral/mining policy and administrative management	Mineral and mining sector policy, planning and programmes; mining legislation, mining cadastre, mineral resources inventory, information systems, institution capacity building and advice; unspecified mineral resources exploitation.
32220	Mineral prospection and exploration	Geology, geophysics, geochemistry; excluding hydrogeology (14010) and environmental geology (41010), mineral extraction and processing, infrastructure, technology, economics, safety and environment management.
32261	Coal	Including lignite and peat.
32262	Oil and gas	Petroleum, natural gas, condensates, liquefied petroleum gas (LPG), liquefied natural gas (LNG); including drilling and production.
32263	Ferrous metals	Iron and ferro-alloy metals.
32264	Nonferrous metals	Aluminium, copper, lead, nickel, tin, zinc.
32265	Precious metals/materials	Gold, silver, platinum, diamonds, gemstones.
32266	Industrial minerals	Baryte, limestone, feldspar, kaolin, sand, gypsum, gravel, ornamental stones.
32267	Fertilizer minerals	Phosphates, potash.
32268	Offshore minerals	Polymetallic nodules, phosphorites, marine placer deposits.
	<b>TOURISM</b>	
33210	Tourism policy and administrative management

## **ENHANCED INTEGRATED FRAMEWORK**

The EIF is a global partnership that is dedicated to supporting the Least Developed Countries (LDCs) to use trade as a tool for economic growth and poverty reduction through job and income opportunities. The EIF empowers LDCs to identify where and how trade can form an integral part of their national development strategies and assist them in harnessing Aid for Trade towards this objective.

The EIF provides country specific and customized support that addresses the full suite of trade capacity building needs. Through building trade capacity, the partnership works together to support the LDCs' own drive to:

- identify and address the priority constraints to trade;
- ensure trade directly supports the national development agenda;
- set up institutional and coordination mechanisms for trade related technical assistance;
- initiate policy reform and mobilize additional financial and technical resources to address priority trade needs.

## **INTERNATIONAL TRADE CENTRE**

ITC is a multilateral agency fully dedicated to developing the international competitiveness of SMEs. As a joint agency of WTO and UN, ITC focuses on small business export success. ITC works especially in least developed countries, land-locked developing countries, fragile and post-conflict countries, Small Island Developing States and sub-Saharan Africa. We help to build vibrant, sustainable export sectors that provide entrepreneurial opportunities, particularly for women, young people and poor communities.

Focus areas for SME competitiveness include:

- Developing trade and market intelligence
- Building a conducive business environment
- Strengthening trade and investment support institutions
- Connecting to value chains
- Supporting regional integration and South-South linkages
- Mainstreaming inclusive and green trade

## **UNITED NATIONS CONFERENCE ON TRADE AND DEVELOPMENT**

UNCTAD, which is governed by its 194 member States, is the United Nations body responsible for dealing with development issues, particularly international trade – the main driver of development. Its work can be summed up in three words: think, debate, and deliver. Reflection on development is at the heart of UNCTAD's work. It produces analyses that form the basis for recommendations to policymakers. UNCTAD is also a forum where representatives of all countries can freely engage in dialogue and discuss ways to establish a better balance in the global economy. In addition, UNCTAD offers direct technical assistance to developing countries and countries with economies in transition, helping them to build the capacities they need to become equitably integrated into the global economy and improve the well-being of their populations.

UNCTAD holds a ministerial-level meeting every four years to discuss major global economic issues and to decide on its programme of work. Every two years, UNCTAD organizes the World Investment Forum, which brings together major players from the international investment community to discuss challenges and opportunities and to promote investment policies and partnerships for sustainable development and equitable growth.

## **INTERNATIONAL TELECOMMUNICATIONS UNION**

ITU is the leading United Nations agency for information and communication technologies (ICTs), driving innovation in ICTs together with 193 Member States and a membership of nearly 800 private sector entities and academic institutions. Established over 150 years ago in 1865, ITU is the intergovernmental body responsible for coordinating the shared global use of the radio spectrum, promoting international cooperation in assigning satellite orbits, improving communication infrastructure in the developing world, and establishing the worldwide standards that foster seamless interconnection of a vast range of communications systems. From broadband networks to cutting-edge wireless technologies, aeronautical and maritime navigation, radio astronomy, oceanographic and satellite-based earth monitoring as well as converging fixed-mobile phone, Internet and broadcasting technologies, ITU is committed to connecting the world.

## **BUSINESS FOR eTRADE DEVELOPMENT**

The research presented in the paper by Kati Suominen is ideated and produced by her firm Nextrade Group. She is also Founder and Interim Executive Director of Business for eTrade Development and authored this chapter in that capacity. Business for eTrade Development has been launched alongside the UNCTAD-led eTrade for All initiative as a private sector voice to help developing country governments, international agencies, and leading donors optimize public policies and aid allocations for ecommerce development and cross-border ecommerce worldwide.

## **WORLD BANK GROUP**

The World Bank Group has set two goals for the world to achieve by 2030: end extreme poverty by decreasing the percentage of people living on less than \$1.25 a day to no more than 3%; and promote shared prosperity by fostering the income growth of the bottom 40% for every country. In the area of trade and competitiveness, the World Bank Group helps countries achieve these two goals through rapid and broad-based economic growth, centred on strong contributions from the private sector. The World Bank Group is working in this area to help countries expand the volume and value of trade, enhance the investment climate, improve competitiveness in sectors, and foster innovation and entrepreneurship.

## **WORLD TRADE ORGANIZATION**

The World Trade Organization (WTO) is the only global organisation dealing with the rules of trade between nations. At its heart are the WTO agreements, negotiated and signed by the bulk of the world's trading nations and ratified in their parliaments. The goal is to help producers of goods and services, exporters, and importers conduct their business.

The WTO's main activities are to:

- negotiate the reduction or elimination of obstacles to trade (import tariffs, other barriers to trade) and agreeing on rules governing the conduct of international trade (e.g. antidumping, subsidies, product standards, etc.)
- administer and monitor the application of the WTO's agreed rules for trade in goods, trade in services, and trade-related intellectual property rights
- monitor and review the trade policies of its members, as well as to ensure transparency of regional and bilateral trade agreements
- settle disputes among its members regarding the interpretation and application of the agreements
- build capacity of developing country government officials in international trade matters
- assist the process of accession of some 30 countries who are not yet members of the organization
- conduct economic research and collecting and disseminating trade data in support of the WTO's other main activities
- explain to and educate the public about the WTO, its mission and its activities.

The WTO currently has 164 members, with more than two-thirds developing economies or separate customs territories.

## **ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT**

The OECD is a unique forum where governments work together to address the economic, social and environmental challenges of globalisation. The OECD is also at the forefront of efforts to understand and to help governments respond to new developments and concerns, such as corporate governance, the information economy and the challenges of an ageing population. The Organisation provides a setting where governments can compare policy experiences, seek answers to common problems, identify good practice and work to co-ordinate domestic and international policies.

The OECD member countries are: Australia, Austria, Belgium, Canada, Chile, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Latvia, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, the Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. The European Union takes part in the work of the OECD.

# AIDFORTRADE AT A GLANCE 2017

## PROMOTING TRADE, INCLUSIVENESS AND CONNECTIVITY FOR SUSTAINABLE DEVELOPMENT

This edition of *Aid for Trade at a Glance* focuses on trade connectivity, which is critical for economic growth, inclusiveness and sustainable development. Physical connectivity enables the movement of goods and services to local, regional and global markets. It is closely intertwined with digital connectivity which is vital in today's trade environment. Yet, the Internet remains inaccessible for 3.9 billion people globally, many of whom live in the least developed countries.

This report builds on the analysis of trade costs and extends it into the digital domain, reflecting the changing nature of trade. It seeks to identify ways to support developing countries – and notably the least developed – in realising the gains from trade. It reviews action being taken by a broad range of stakeholders to promote connectivity for sustainable development, including by governments, their development partners and by the private sector. One message that emerges strongly is that participation in e-commerce requires much more than a simple internet connection.
