## **1 DISPUTE SETTLEMENT INFORMATION TABLES**

### **Explanatory note to Dispute Settlement information tables**

1. This section of the Analytical Index presents information tables pertaining to diverse aspects of WTO dispute settlement practice and procedure, including but not limited to amicus briefs, BCI Procedures, enhanced third-party rights, individual opinions, open hearings, time periods. These tables are gathered in one section to present the information in a more user-friendly manner.
2. In previous editions and iterations of the WTO Analytical Index, information tables were presented on an article-by-article basis, and this required users to know which DSU provision to look under when searching for information that might be presented under more than one DSU provision. It also resulted in a degree of fragmentation of information, because for many cross-cutting topics there may be different DSU provisions governing panel, Appellate Body, Article 21.5 panel and/or 22.6 arbitration proceedings.
3. In this section, tables are presented according to general topics, with an introduction that identifies the relevant DSU provision(s). Where a table formerly appeared under a given provision of the DSU, it has been replaced with a simple cross-reference to this section.

**Tables on amicus curiae briefs, scientific experts, and international intergovernmental organizations (panel, AB and 22.6)**
