3. In this Rules the following definitions shall be used:

1) ad valorem share - percentage share of the cost of the used materials or added value reaches a fixed percentage of the price "ex-works" of the delivered goods;

2) re - export of - export of goods imported from abroad without their processing;

3) cumulative principle - one of the principles for determining the country of origin, according to which the origin of the goods as a result of sequential processing of goods in the member states of the Agreement on the Free Trade Area of 15 April 1994 (hereinafter - the Agreement) is determined by the country of manufacture of the final product ;

4) the applicant - a natural or legal person interested in obtaining of a certificate of origin;

5) expert organization - a legal entity which is having an expert auditor in its staff to determine the country of origin of goods, is working on the examination of the origin of the goods;

6) mass produced goods - goods, production of which is repeated in separate batches for a long time;

7) commodity nomenclature of foreign economic activity (hereinafter - HS) - classifier of goods, which includes commodity groups, headings, subheading, sub subheading as a digital sign or group of digits (codes). An integral part of the commodity nomenclature of foreign economic activity is the explanations for headings at any level of classification, as well as the basic rules of interpretation of the commodity nomenclature of foreign economic activity;

8) the share of local content in goods - the percentage of the cost of the used local materials and cost producer of goods for processing of goods within the territory of the Republic of Kazakhstan, in the final cost of the goods;

9) criteria for sufficient processing of goods - one of the principles for determining the country of origin, in accordance with which the product if its production involves two or more countries is considered as originated from the country where it had been substantially processed last time sufficient to give the commodity its characteristic properties;

10) certificate of origin - a document certifying the country of origin and issued in accordance with the legislation of this state or the state of export, if the State of export certificate issued on the basis of information received from the country of origin;

11) country of origin of goods - the country in which the goods were completely produced or sufficiently processed;

12) Goods - property sold in the territory of the Republic of Kazakhstan or moved across the border of the Republic of Kazakhstan, including electrical, thermal and other types of energy, as well as vehicles, except for vehicles used for the international carriage of passengers and goods;

13) expert auditor to determine the country of origin - a specialist certified in the manner prescribed by the authority;

14) a unique product number - number of the product that is applied to each unit of product is the unchanged that lasts for life / date specified for this type of product, having a structure in accordance with the industry standard;

15) price on an "ex-works" - the price to be paid to the manufacturer, the company that produces the latest processing, on an "ex works", excluding any internal taxes that are paid or may be paid when exporting manufactured goods;

16) authorized body - the state body exercising the state regulation in the field of technical regulation;

17) authorized organization - the National Chamber of Entrepreneurs of the Republic of Kazakhstan, carrying out registration, certification and issuance of a certificate of origin, and also authorized the issuance of a certificate of origin for domestic circulation;

18) classification of products by economic activity - Classification of Products, which establishes the classification and coding of products by economic activity;

19) export - export of domestic or previously imported from abroad and subjected to processing of goods for their implementation in the foreign market.

2. Determination of the country of origin, registration, certification and issuance of a certificate of origin goods for goods exported, re-exported from the Republic of Kazakhstan

4. To determine the country of origin it must be established that the goods are:

- 1) wholly Kazakh origin;
- 2) Kazakh origin, taking into account the criterion of sufficient processing of goods;
- 3) foreign origin.

5. Goods wholly produced in the Republic of Kazakhstan, are:

- 1) the minerals extracted from the interior of the country, in its territorial waters (seas) or on its continental shelf;
- 2) products of the plant grown or gathered in this country;
- 3) live animals born and (or) raised in that country;
- 4) products obtained in the country from animals raised therein;
- 5) products received as a result of hunting and fishing trade in this country;
- 6) products of sea fishing trade and other products of the sea trade received by the vessel of this country or leased (chartered) it;
- 7) products obtained aboard a factory ship of the country exclusively from products referred to in paragraph 6) of this paragraph;
- 8) products obtained from the seabed or subsoil from the sea outside the territorial waters (sea) of the country, provided that the country has exclusive rights to development of such seabed or marine depth;
- 9) waste and scrap (secondary raw materials) derived from manufacturing or other processing operations, and used articles, collected in that country and fit only for the recovery of raw materials;
- 10) products of high technologies obtained in the open space on space ships belonging to this country or rented (chartered) by it;
- 11) goods produced in the country exclusively from products referred to in subparagraphs 1), 2), 3), 4), 5) 6) 7) 8) 9) 10) of this paragraph.6. If two and more countries participate in production of the goods, the country of source of the goods the country in which the last transactions on conversion of the goods, answering to criteria of sufficient conversion of the goods were performed is considered.

7. The criteria for sufficient processing of goods for giving it the status of originating in the Republic of Kazakhstan are:

- 1) change of the commodity code according to the Commodity nomenclature of foreign economic activity at level of any of the first four digits, resulted conversion of the goods;
- 2) the performance of industrial or technological operations sufficient for the country of origin is the country where these operations took place;
- 3) changes in the value of the goods when the percentage value reaches a fixed share of the price of the final product (ad valorem share rule)

8. The main criterion of sufficient conversion of the goods is change of the commodity code according to the commodity nomenclature of foreign economic activity at level of any of the first four digits, occurred as a result of processing of goods, except for goods included in the list of conditions, industrial and technological operations necessary for giving the status of product origin when used in the manufacture of goods from third countries.

In this list as one of the conditions included ad valorem share rule, both independently and in conjunction with other criteria of sufficient processing of goods.

To assess the criterion of sufficient processing of goods may apply cumulative principle, according to which the origin of the goods as a result of sequential processing of goods in the member states of the Agreement is determined by the country of manufacture of the final product.

If the production of final goods in one of the States Parties to the Agreement on granting preferences using raw materials originating from other States Parties to the Agreement, confirmed by a certificate of origin, and subjected to further processing phase in other States parties to the Agreement, the country of origin such goods shall be the country where the last time he was subjected to processing.

In the absence of a certificate of origin of raw materials or the final determination of the country of origin of goods is established by paragraph 7 of these Rules.

To determine the country of origin of goods produced and exported from the Republic of Kazakhstan in the Commonwealth of Independent States and the European Community and the United States, Canada, Japan, Turkey, Australia, New Zealand, Switzerland and Liechtenstein, Norway under the Generalized System of Preferences, and in the country for which proof of origin of goods is carried out certificate form "Original", the list of conditions, production and technological operations listed in the Agreement on Rules of origin of goods in the Commonwealth of Independent States, approved by the Government of the Republic of Kazakhstan dated December 30, 2010 for number 1478, and Regulations European Economic Community № 2454/93.

The origin of the goods produced and exported from the Republic of Kazakhstan to the countries which have signed free trade agreements, with the exception of the Commonwealth of Independent States, is determined on the basis of these international treaties in force for the Republic of Kazakhstan.

9. The conditions which are not meeting the criteria for sufficient processing of goods for giving it the status of originating in the Republic of Kazakhstan, are:

1) transactions on ensuring safety of the goods during their storage or transportation;

- 2) transactions on preparation of goods for sale and transportation (breaking into smaller lots, organization of shipments, sorting, repacking);
- 3) washing, cleaning, removal of dust, oxide coating, oil and other substances;
- 4) ironing or pressing of textiles (all kinds of fibers and yarns, woven fabrics of all kinds of fibers and yarns and products made of them);
- 5) operations painting or varnishing;
- 6) peeling, partial or total bleaching, polishing and grinding cereals and rice;
- 7) the operation of coloring sugar or sugar lump formation;
- 8) peeling, cutting and extraction of seeds of fruits, vegetables and nuts;
- 9) sharpening, simple grinding or simple cutting;
- 10) sieving through a sieve or a sieve sorting, classification, screening, selection (including the preparation of sets of products);
- 11) spill, packing in cans, bottles, bags, boxes and other simple packaging operations;
- 12) simple assembly operations or dismantling of goods in installments;
- 13) separating the products into components, which does not significantly differ from the original components of the received goods;
- 14) mixing of goods (components), which does not lead to a significant difference between the obtained product from the original components;
- 15) slaughtering, butchering (sorting) of meat;
- 16) a combination of two or more of the above operations.

10. If the rule of the ad valorem share is applied, calculation of the ad valorem share in production of the goods is made:

- 1) for imported goods - on the customs value of the goods when they are imported into the country, where the production of the final product, or if the origin of the imported goods is unknown - according to the documented price of their first sale in the territory of the country where the production of the final product ;
- 2) for the final product - the price of the plant (warehouse) of the seller, not including the cost of loading, customs declaration and export of goods from the country of export (price on an "ex-works").

11. In determining the country of origin of goods in unassembled or disassembled state, delivered in several batches, if for production or transport conditions they can not be shipped in one shipment, as well as in cases where the consignment is broken down into several lots by mistake or wrong address shall be considered to request of the declarant as a single product.

The provisions of this paragraph shall apply subject to the following conditions:

1) The prior notification of the customs authority of the importing country on the breakdown of the dismantled or non-assembled commodities into several lots with an indication of the reasons, the application detailed specification for each lot with indication of codes of commodities under the nomenclature of foreign economic activity, value and country of origin of the goods included in each batch, as well as notification of broken goods in several lots by mistake or wrong address - if the documentary evidence of the fallacy of a breakdown of the goods;

2) delivery of all consignments from one country one exporter (supplier); import and clearance of all shipments via the same customs;

3) delivery of all consignments within a period not exceeding six months from the date of acceptance of the customs declaration.

12. In order to determine the origin of the country of origin of goods used for their production of heat and electricity, machinery, equipment and tools are not taken into account.

Devices, accessories, spare parts and tools for use with machines, equipment, devices or vehicles considered as originating from the same country as the machines, equipment, vehicles or vehicles if these devices, accessories, spare parts and tools imported and sold as a set with the above machines, equipment, devices or vehicles and in an amount usually comes with these devices.

13. Works associated with the expertise to determine the country of origin, carried out on a contractual basis on the basis of an application filed by the applicant in the expert organization, and submitted by the applicant on the list of documents referred to in paragraph 16 of this Rules.

14. Examination of Origin expert auditors carried out to determine the country of origin of goods within two working days from the date of filing of the application, and with a full package of documents confirming the origin of the goods.

15. Examination of origin include:

1) examination of the documents confirming the origin of the goods, on a list approved by the authority;

2) identification of the goods by external signs, marking (name, type, species, packaging, grade, manufacturer), if necessary, to travel to the location of the goods;

3) examination of the process of production of goods in order to establish a criterion of sufficient processing of goods and certain value-added goods.

16. According to Annex 2 to these Rules for the examination of the origin of the goods, as well as the re-export of goods, together with the application are presented documents proving the origin of the goods on the list approved by the competent authority.

With multiple deliveries of goods under a single contract allowed to issue the examination certificate to the contract at the first batch of shipment for one year, including the goods of mass production.

In the examination certificate sent by the first consignment of goods specified contractual party or annual release of the goods.

When changing production technology and components in this product, as well as the country providing materials the applicant within five working days, inform the expert organization to determine the country of origin of these changes in order to obtain a new certificate of examination of the origin and certificate of origin.

17. If necessary, additional research expert organization asks:

1) originals and copies of permits, licenses, documents certifying the origin of the raw materials and components;

2) test report issued by an accredited test laboratories (centers), if not possible to identify the goods without laboratory tests and studies.

The original documents are returned to the applicant within one working day after their identification with copies.

18. According to the results of examination the expert organization provides examination certificate of origin in accordance with Annex 3 to these Rules, composed of expert auditors to determine the country of origin, that the product is:

1) Kazakhstan origin, taking into account the criterion of sufficient processing of goods;

2) foreign origin.

19. Conducts review and sign the expert opinion of expert auditors to determine the country of origin, received a qualification certificate and entered in the register of expert auditors to determine the country of origin.

20. The applicant self-selects the expert organization. Register of expert auditors to determine the country of origin and the list of expert organizations posted on the website of the authority.

21. When re-export documents submitted additionally authorized organization, confirming the import of goods into the Republic of Kazakhstan (copy of the certificate of origin, customs declaration and shipping documents).

Registration, certification and issuance of certificate of origin

22. Before placing a certificate of origin authorized person authorized organization shall issue an opinion about the design of a certificate of origin. To do this, the analysis submitted by the applicant documents confirming the origin of the goods, and the analysis of the examination of the origin of the goods for its proper execution.

23. Registration, license and certificate of origin are carried out on the following forms:

- 1) Certificate form "ST-1" - for goods exported from the Republic of Kazakhstan in the Commonwealth of Independent States;
- 2) The certificate form "ST-2" - for goods exported from the Republic of Kazakhstan in the country, which are committed and the free trade agreement, with the exception of the Commonwealth of Independent States;
- 3) The certificate form "A" - for goods exported to the Member States of the European Community and the United States, Canada, Japan, Turkey, Australia, New Zealand, Switzerland and Liechtenstein, Norway under the Generalized System of Preferences;
- 4) Certificate form "Original" - in English or Russian languages (determines the applicant) for goods exported to countries not referred to in subparagraphs 1), 2) and 3) of this paragraph.

24. Certificate of origin issued, shall be certified and issued within one working day on the basis of:

- 1) Application person or entity to issue a certificate of origin, in accordance with Annex 4 to these Rules;
- 2) of the examination of the origin of the goods;
- 3) documents confirming the origin of the goods, on a list approved by the authority.

Certificate of origin of goods wholly produced in the Republic of Kazakhstan, provided for in paragraph 5 of these Rules shall be issued on the basis of the documents referred to in subparagraphs 1) and 3) of this paragraph.

25. When goods are exported from the territory of the Republic of Kazakhstan certificate of origin is issued for each consignment is sent simultaneously, which is carried out by one or more vehicles to the same consignee from the same shipper.

26. Certificate of origin issued on letterhead with the degree of protection: the first instance - the script, the second and the third copy - copy. The original and one copy of the certificate shall be issued to the applicant, and the second copy is kept in an authorized organization that issued the certificate of origin.

Authorized organization keeps records of use, storage and issue of the forms of the certificate of origin in accordance with the requirements of these Rules.

27. Certificate of origin issued, shall be certified and issued by an authorized organization.

With multiple deliveries of goods under a single contract allowed to issue certificates of origin for each consignment is sent simultaneously by a copy of the examination, the original of which was issued for the whole consignment contract for goods or serial production and exporter presented at the first shipment.

The application for a certificate of origin the applicant personally confirms that outgoing shipments of goods is not subjected to changes in production technology and components, as well as country-materials supplier to this product.

28. The certificate of origin is as follows:

- 1) twelve months from the date of issue for the form "ST-1";
- 2) twelve months from the date of issue for the shape of "Original";
- 3) ten months from the date of issue for the form "A".

29. The certificate of origin of the goods is considered void if in it there are erasures, the blots, not certified correctings, are absent necessary signatures and (or) seals.

In case of change of the data containing in the certificate of origin of the goods, the new certificate is issued only after return by the applicant of earlier issued certificate which is cancelled and hemmed as reasons in case of issue of the new certificate of origin of the goods, and also availability of the necessary documents confirming these changes.

30. The drawn-up certificates are issued to the applicant under the list in the magazine of registration of the issued certificates of origin of the goods.

31. Transfer of certificates of origin of the goods to other persons is not allowed.

32. Repetitions of certificates of origin of the goods and documents based on which they were issued, are stored in the authorized organization at least three years from the date of issue of the certificate of origin of the goods.

33. In case of re-export of the goods within the states agreement parties issue of zamenny certificates in the presence of the repetition of the certificate of the ST-1 form of the country of source of the goods is possible.

In case of re-export of the goods within the states agreement parties made in their territories and delivered on customs areas of the states agreement parties before entry into force of Rules of determination of the country of source of the goods from September 24, 1993, approved by the decision of Council of heads of governments of the Commonwealth of Independent States, issue of the certificate of origin of the goods of the ST-1 form is possible. Issue of the certificate is possible under condition of submission of supporting documents about the manufacturer of the goods (the name with indication of the republic of the Union of the Soviet Socialist Republics and the postal address) and years of production of the goods.

3. Determination of the country of origin of goods for internal circulation

34. In order to determine the country of origin must be established that the goods:

- 1) All of Kazakh origin;

2) Kazakhstan origin, taking into account the criterion of sufficient processing of goods.

35. The definition of goods considered wholly produced in the Republic of Kazakhstan, is made in accordance with paragraph 5 of these Rules.

36. The criteria for sufficient processing of goods of Kazakhstan origin for domestic circulation are:

1) criterion in subparagraph 1) of paragraph 7 of these Rules;

2) the specific conditions of production and technological operations necessary for giving the status of product origin for use in the manufacture of goods from third countries listed in Annex 9 to these Rules;

3) changes in the value of the goods when the proportion of local content in the product price is not less than 30 percent of finished goods under the terms of prices "ex-works".

37. The main criterion of sufficient processing of goods is to change the product code on the commodity nomenclature of foreign economic activity at any of the first four digits, occurred as a result of processing of goods, except for goods included in the list of conditions, industrial and technological operations necessary for giving the status of product origin when used in the manufacture of goods from third countries.

In this list as one of the conditions included ad valorem share rule, both independently and in conjunction with other criteria of sufficient processing of goods.

Annex 9 of the said Rules established a list of conditions, industrial and technological operations necessary for giving the status of product origin, in respect of particular goods to determine the country of origin of goods produced in special economic zones and free warehouses of the Republic of Kazakhstan, intended for further treatment in Kazakhstan as well as produced or sufficiently processed in accordance with the criteria of sufficient processing of goods in the territory of the Republic of Kazakhstan and implemented on the territory of the Republic of Kazakhstan.

In case of discrepancy criteria for sufficient processing of goods specified in subparagraphs 1) and 2) of paragraph 36 of these Rules, the criterion of sufficient processing of goods specified in subparagraph 3) of paragraph 36 of these Rules.

38. The conditions that do not meet the criteria of sufficient processing of goods, set out in paragraph 9 of these Rules.

39. If the rule applies to ad valorem percentage, the calculation of ad valorem share in the production of goods is made in accordance with paragraph 10 of these Rules.

Calculation of ad valorem share in the production of goods is made by the formula in accordance with Annex 1 to these Rules.

40. Determination of the country of origin of goods supplied unassembled or disassembled state, is made in accordance with paragraph 11 of this Rules.

41. Features of determining the country of origin of goods for domestic circulation provided to meet the requirements of paragraph 12 of these Rules.

On the product completely Kazakhstan origin, the proportion of local content is one hundred percent. The calculation of the proportion of local content packaging, inseparable from this product, not made.

42. Examination by determination of the country of source of the goods is carried out on the contractual basis based on the request submitted the applicant to the expert organization, and the documents provided by the applicant according to the list specified in Item of 45 these rules.

43. Examination of the parentage of the goods is performed by the expert-auditor by determination of the country of source of the goods within two working days from the moment of representation and registration of the request with the complete document package, confirming the parentage of the goods.

44. Examination of the parentage of the goods includes:

1) examination of the documents confirming the parentage of the goods, according to Item of 45 these rules;

2) identification of the goods on external signs, marking (the name, type, packaging, the class, manufacturer) with departure on the location of production;

3) examination of engineering procedure in case of production of the goods for the purpose of establishment of criterion of sufficient conversion of the goods and determination of value added of the goods.

45. According to appendix 5 to these Rules on carrying out examination of the parentage of the goods together with the request the following documents are shown:

1) the documents confirming legal position of the applicant (for the physical persons engaging in business activity without education of the legal entity, - the passport, the identity certificate, the patent or the certificate of the individual entrepreneur);

2) the original and the repetition of the documents confirming the parentage of the goods (the agreement with the producer of the goods or on acquisition of the goods, delivery notes, invoices, documents on transportation of the goods);

3) original and repetition of the license by sight activities;

4) the original and the repetition of documents for determination of criterion of sufficient conversion of the goods (cost of raw materials and the components used in production of the goods, delivery agreements of raw materials and/or the invoice, and/or delivery notes, the fabrication documentation with appendix of the list of regulating technical documents according to which the goods, calculation of cost of the goods taking into account cost of used raw materials or the component of the foreign origin are made);

5) the original and the repetition of the warehouse reference on availability and goods quantity in the warehouse with indication of the address of the warehouse;

6) the original and the repetition of the power of attorney on representation of interests of the applicant;

7) for fruit-and-vegetable products: the original and the repetition of the reference confirmation of local executive body of the corresponding territorial unit of the Republic of Kazakhstan about cultivation of the declared lot of products in the specified territory and the agreement with the producer of products, the agreement on acquisition of the goods with obligatory submission of the original or the notarized repetition of the agreement with the producer of the goods.

Originals of documents return to the applicant within one working day after their identification with repetitions.

46. In case of carrying out examination of the parentage of the goods of serial production delivery notes, invoices, documents on transportation of the goods, and also the warehouse reference are not required.

47. In case of need the expert organization requests carrying out additional researches:

1) originals and repetitions of permissions, licenses, the documents certifying the parentage of raw materials, materials, accessories;

2) the test report issued by accredited test laboratories (centers) if identification of the goods without laboratory experiments and researches is impossible.

Originals of documents return to the applicant within one working day after their identification with repetitions.

48. By results of examination the expert organization certifies and issues the appraisal certificate about the parentage of the goods, according to appendix 6 to the these rules, constituted by the expert-auditor by determination of the country of source of the goods, that the goods are:

1) completely Kazakhstan origin;

2) the Kazakhstan origin taking into account criterion of sufficient conversion of the goods.

49. In case of carrying out examination of the parentage of the goods of serial production effective period of the appraisal certificate about the parentage of the goods of serial production constitutes 1 year. Thus in the appraisal certificate about the parentage of the goods in column 10 the annual amount of the goods of serial production is specified.

For the companies performing serial production of the goods more than three years, in case of submission of the documents specified in Item of 45 these rules, proving the invariance of the production technology, the country supplier of raw materials (materials), and also costs of raw materials and components the next three years, effective period of the appraisal certificate about the parentage of the goods of serial production are constituted by three years. Thus in the appraisal

certificate about the parentage of the goods in column 10 the three-year amount of the goods of serial production is specified.

In cases of changes of the production technology of the goods, the country supplier of raw materials (materials), and also cost of raw materials and components, the applicant within five working days informs the expert organization on these changes for the purpose of receipt of the new appraisal certificate about the parentage of the goods and the certificate of origin of the goods for the internal address.

50. The expert opinion the expert-auditor by determination of the country of source of the goods, the received competence certificate and brought in the register of experts-auditors by determination of the country of source of the goods examines and signs.

51. In case of establishment of the parentage of the goods made from the goods (raw materials, materials, products) completely Kazakhstan parentage, in the appraisal certificate about the parentage of the goods it is necessary to reflect:

1) engineering procedure of production of these goods (regulating document, technological instructions);

2) suppliers of raw materials, materials and the components used in case of production of the goods;

3) availability (the name, number) documents on payment of the bought raw materials and components.

Registration, certification and issuance of certificate of origin for domestic circulation

52. Certificate of origin form «CT-KZ» is issued, shall be certified and issued to the authorized organization on the letterhead of the form, in accordance with Appendix 7 to these Rules for the goods:

1) sufficiently processed in accordance with the criteria of sufficient processing of goods and exported from the special economic zones and free warehouses to the rest of the territory of the Republic of Kazakhstan;

2) produced or sufficiently processed in accordance with the criteria of sufficient processing of goods in the territory of the Republic of Kazakhstan and implemented on the territory of the Republic of Kazakhstan.

53. When importing goods from the territory of special economic zones and free warehouses to remaining part of the territory of the Republic of Kazakhstan and (or) sale of goods in the territory of the Republic of Kazakhstan certificate of origin form «CT-KZ» is made for the supply of goods or batch production and issued by the manufacturer or authorized person.

Goods produced in the territory of the free warehouse and sold owner free warehouse on the territory of the Republic of Kazakhstan, an integral part of the certificate form "ST-KZ» is a bill containing a unique product number, which is

issued by the manufacturer for each lot of imported goods and be submitted only in the case of a request tax or customs authority.

54. At the mass production of goods certificate of origin form "ST-KZ» issued to the applicant, are the producers of serial production, for the duration of the examination of the origin of the goods and the amount of the goods specified in the examination certificate of origin. An integral part of the certificate form "ST-KZ» is a bill containing a unique product number, which is issued by the manufacturer for each imported consignment serial production and be submitted only in the case of a request of the tax or customs authority.

55. Certificate of origin form «CT-KZ» is issued, shall be certified and issued on the basis of:

- 1) statements in accordance with Appendix 8 to these Rules;
- 2) of the examination of the origin of the goods;
- 3) The documents submitted by the applicant for examination, in accordance with paragraph 45 of these Rules;
- 4) an inventory of the documents attached.

56. Certificate of origin form «CT-KZ» is filled in accordance with the procedure set out in paragraph 60 of these Rules, shall be certified by an authorized person authorized organization.

57. Authorized body keeps records of use, storage and issue of the forms of the certificate of origin form «CT-KZ» in accordance with the requirements of these Rules.

58. Certificate of origin form «CT-KZ» issued on the letterhead with the degree of protection: the first instance - the script, the second and the third copy - copy. The original and one copy of the certificate shall be issued to the applicant, the second copy is kept in the authorized organization.

At the request of the applicant organization authorized to issue the required number of copies of the certificate upon presentation of the original certificate of origin. On the front side of copies in boxes blank "For official use" or "more information" is recorded: "true copy", date of issue up to the authorized person's signature seal of the authorized organization.

59. The empty space in the form of a certificate of completed graphs «CT-KZ» - graphs 6, 7, 8, 9, 10; crossed out by hand (the sign «Z») in order to avoid making additional entries after his identity.

60. Certificate of origin is not valid if it contains erasures, blots, uncertified corrections, lacks the necessary signatures and (or) printing. Corrections and (or) amendments to the certificate of origin shall be made by crossing out incorrect information and overprinting adjusted data, then I assure signature of the person

authorized to certify the certificate of origin, and sealed by the authorized organization.

If you change the data contained in the graphs of the certificate, the new certificate is issued only after the return of the applicant previously issued certificate that is canceled and filed as a justification for the issuance of new, as well as the necessary documents confirming these changes. Column 5 certificate form «CT-KZ» the note "issued instead of a certificate" with the number and date of revoked certificate (certificate issued in exchange revoked certificate is assigned a new registration number).

61. Copies of the certificate of origin form «CT-KZ» and documents on the basis of which they were issued, are stored in the authorized organization for three years.

62. The certificate of origin form «CT-KZ» is twelve or thirty-six months from the date of issue, depending on the period of validity of the examination of the goods.

63. Certificate form «CT-KZ», in accordance with Appendix 7 to these Rules shall be filled in the state or Russian languages, graphs certificate shall contain the following information about the product to which it is issued:

1) Count 1 - "Product Manufacturer (name and postal address)" - the name of a natural or legal person who is the producer of the product according to the documents confirming the legal status of the manufacturer of the goods:

for a legal entity - according to a notarized copy of the certificate * or a certificate of state registration (re-registration) of the legal entity;

for individuals - according to a notarized copy of an identity document and a notarized copy of the certificate of state registration as an individual entrepreneur.

When filling out the graphs indicate the mailing address of the manufacturer, according to the document, confirming the actual location of the manufacturer of the goods.

2) Column 2 "Receiver of the goods (name and postal address)" - the name of a natural or legal person who is the recipient of the goods according to the documents confirming the legal status of the recipient of the goods:

for a legal entity - according to a notarized copy of the certificate * or a certificate of state registration (re-registration) of the legal entity;

Note: * The certificate of state (accounting) registration (re-registration) of the legal entity (branch, representative office), issued prior to the enactment of the Law of the Republic of Kazakhstan dated December 24, 2012 "On Amendments and Additions to Certain Legislative Acts of the Republic of Kazakhstan on state

registration legal entities and registration of branches and representative offices, "is valid until the termination of the legal entity;

for individuals - according to a notarized copy of an identity document and a notarized copy of the certificate of state registration as an individual entrepreneur.

When filling out the graphs indicate the mailing address of the recipient of the goods, according to the document, confirming the actual location of the recipient of the goods.

Count "Recipient of goods" is populated only if the applicant is not the manufacturer of the product, and authorized by the person representing the interests of the producer of goods by proxy, or the person to whom this product was sold by the manufacturer, in column 5 "For official use" states the above-mentioned agreement for the acquisition of goods between a manufacturer and a recipient of the goods.

In the case of export of goods from the territory of special economic zones and free warehouses Republic of Kazakhstan to the rest of the Republic of Kazakhstan, column 2 "Receiver goods" is filled with similarly only in the event of an authorized person (a mediator).

3) Column 3 - "The purpose of obtaining a certificate of origin" stated goal of obtaining a certificate of origin;

4) Count 4 - registration number of the certificate of origin; the country that issued the certificate ("Republic of Kazakhstan");

5) Column 5 - "For official use". Entered service marks state regulatory agencies, as well as the following entries: "Duplicate", "Issued instead of certificate", "Outstanding for mass production. The certificate of origin is twelve months from the date of issuance, "" Outstanding for mass production. The certificate of origin is thirty-six months from the date of issue. "In the case of a recipient of the goods specified in the contract of purchase of a product between the recipient of the goods and producer goods. In the case of renewal of a certificate shall include all certificate numbers, on the basis of which it was redesigned;

6) Count 6 - "Number" indicates the serial number of the product;

7) Column 7 - "Number and type of packaging" specified number of places and type of packaging goods (party);

8) Column 8 - "Description" - the commercial name of the product and other information that can help make an unambiguous identification of the goods.

When filling out the graphs indicate the code of commodities under the nomenclature of foreign economic activity and classifier of products by economic activity;

9) Column 9 - "The criterion of origin" shall include the following criteria of origin:

P - goods wholly produced in the Republic of Kazakhstan;

D - goods subjected to sufficient processing, indicating the first four digits of the code (heading) of the commodity nomenclature of foreign economic activity of the final product. When filling the column indicates the percentage share of local content in the product. The calculation of the proportion of local content in the production of goods is made by the formula in accordance with Annex 10 to these Rules.

If a certificate stating goods classified in various headings of the commodity nomenclature of foreign economic activity and have different criteria of origin, in column 9 gives the criteria of origin for all differentially declared goods;

10) Count 10 - "The number of goods."

The mass of gross / net (kg) and / or other quantitative characteristics of the goods in accordance with the HS. The discrepancy between the actual value of the goods as specified in the certificate shall not exceed 5%.

When drawing up the form «CT-KZ» product serial production of columns 2, 7, 10 are not filled;

11) Count 11 - "Certification" contains the name of the authorized organization, address, stamp, date of license data specified in the certificate and signature, name and initials of the person authorized to assure the certificate;

12) Column 12 - "Declaration by the applicant" shall include the name of the country of origin, place and date of the declaration of the country of origin, name and initials of the authorized person of the applicant, the applicant's signature and seal.

4. Issue of the certificate of origin of the goods subsequently (retrospectively)

Certificate of origin issued in exceptional cases after the export of goods, export and sale of goods bonded warehouse and special economic zones in the rest of the territory of the Republic of Kazakhstan, provided that the certificate has not been issued at the time of export, as well as the export of goods produced in the free warehouses and special economic zones, to be implemented in the Republic of Kazakhstan due to accidental errors or omissions special circumstances for technical reasons.

65. The notified body shall issue a certificate of origin later, that is (in retrospect) only after verifying that the information contained in the statement of the applicant, the same with the information contained in the relevant documents (documents provided by paragraphs 16 and 45 of these Rules, as well as confirmation of the actual shipment of goods (customs declaration marked the customs authority of the Republic of Kazakhstan "Issue resolved"), and a certificate of origin was not issued when this product was exported or sold with a free warehouse or special economic zones in the rest of the territory of the Republic of Kazakhstan.

66. Certificate of origin issued subsequently (retrospectively) shall contain in box 5 of the certificate of origin form "ST-1" and «CT-KZ» entry: "Outstanding later."66. The certificate of origin of the goods issued subsequently (retrospektivno), shall contain entry in column 5 of the certificate of origin of the goods of the ST-1 and CT-KZ forms: "It is issued subsequently".

5. Issue of the duplicate of the certificate of origin of the goods

67. In case of loss or damage to the certificate of origin, the applicant applies in writing to the authorized organization that issued the certificate of origin, a statement on the issue of a duplicate certificate. Registration number issued by the duplicate registration number corresponds to the original. Column 4 of the certificate form «CT-KZ» entry is "Duplicate» («Dublicate») and specify the registration number and date of issue of the original. In column 12 of the certificate of origin form «CT-KZ» indicates the date of issue of a duplicate.

68. A duplicate of the certificate is valid until the expiration of the term for which the original was issued.

6. Grounds for refusal to issue the certificate of origin

69. Authorized body refuses to issue the applicant a certificate of origin and the reasons for refusal in the following cases:

1) submission of improperly issued the certificate of examination of the origin of the goods and (or);

2) failure to submit documents proving the origin of the goods, according to the list approved by the competent authority in the field of technical regulation and maintenance of unity of measurements;

3) failure to submit documents proving the origin of the goods, according to the list referred to in paragraph 45 of these Rules.

70. The term of the issuance of a certificate of origin, a duplicate certificate of origin or the written reasoned decision to refuse to issue it can not exceed one working day, and in the cases provided for in paragraph 5 of these Rules, - two

working days from the date of the registration application to the authorized organization.

Appendix 9
to Rules by determination of the country
of origin of the goods,
registration, the certification
and issuing of the certificate of
origin of the goods

Criteria of sufficient processing of the goods

HS Code	Name of goods	Conditions, production and technological operations which are necessary for giving the goods

		of the status of the origin in case of use in production of the goods third countries
1	2	3
0201	Meat of cattle, is fresher or cooled	Production from materials of any line items, except meat of cattle, cooled of the line item 0202
0202	The meat of cattle refrigerated	Production from materials of any line items, except meat of cattle, fresh or cooled line items 0201
0206	Alimentary offal of cattle, pigs, sheep, goats, horses, donkeys, mulovili hinnies, fresh, cooled or refrigerated	Production from materials of any line items, except frames of line items 0201-0205
0207	Meat and alimentary offal of the poultry specified in the goods item 0105, fresh, cooled or refrigerated	Production from materials of any line items in the conditions of specialized production according to technology of conversion
0210	Meat and alimentary meat offal, salty, in the brine, dried or smoked; the alimentary meal thin and coarse grinding from meat or the meat offal	Production from materials of any line items, except meat and the alimentary meat offal of line items 0201-0206 and 0208 or the liver of birds of line items 0207
0402	Milk and the cream condensed or with addition of Saccharum or other sweetening substances	Production from materials of any line items. However cost of used materials of the same line item, as the finished stock, shall not exceed 40 % of the price of end products
0408	Eggs of birds without the hull and egg yolks, fresh, dried, welded on pair or in the boiling water, formed, refrigerated or preserved in a different way, with addition or without addition of Saccharum or other sweetening substances	Production from materials of any line items, except for eggs of birds of line items 0407
0506	Bones and the cornual hinge, raw, fat-free, subjected to roughing-out (without giving of the form),	Production in case of which materials of group 02 are used

	processed by acid or ezhelatinizirovanny; powder and wastage of these products	
0710 40 000 0	Sweet corn (crude or welded in water or on pair), refrigerated	Production from sweet corn, is fresher or cooled
0711 90 300 0	Corn sugar preserved for short-term storage, but in such type not suitable for the direct use in nutrition	Production from sweet corn, is fresher or cooled
0901	Coffee, fried or not fried, with the coffeine or without the coffeine; coffee husk and covers of grains of coffee; the substitutes of coffee containing coffee in any proportion	Production from materials of any line items under condition of accomplishment of technological transactions on formulation and the obzharivaniye
0902	Tea with vkuso-aromatic additives or without them	Production from materials of the line item 0902 under condition of accomplishment of technological transactions on formulation and the kupazhny admixture, however cost of all used materials shall not exceed 50 % of the price of end products
1106 10 000 0	Meal thin and coarse grinding from dried leguminous vegetables of the goods item 0713	Production from materials of any line items in case of which cost of all used materials shall not exceed 50 % of the price of end products
1301	Shellac the natural crude; natural gum, pitches, gummismoly and gallipot (for example, balms)	Production from materials of any line items in case of which cost of used materials of the line item 1301 shall not exceed 50 % of the price of end products
1501	Fat pork (including lyard) and fat of poultry, except fat of the goods item 0209 or 1503	Production from materials of any line item, except for materials of the line item 0203, 0206 either 0207, or 0506; production from meat or the offal of pigs of the line item 0203 either 0206, or meat or the offal of the bird of the line item 0207
1502	Fat of cattle, sheep or goats, except fat of the goods item 1503	Production from materials of any line item, except for materials of

		line items 0201, 0202, 0204 either 0206, or 0506
1504-1506 00 000 0	Fats, oils and their fractions, from fish or the sea mammals, not refined or refined, but without change of the chemical composition – other animal fats, oils and their fractions not refined or refined, but without change of the chemical composition	Production from materials of any line items under condition of accomplishment of the following technological transactions: Vytopyka; evaporation; cleaning
1507-1515	Oil soya and its fractions not refined or refined, but without change of the chemical composition – other nonvolatile seed fats, oils (including oil jojoba) and their fractions not refined or refined, but without change of the chemical composition	Power tool cleaning way: upholding, filtering; centrifugations; processings by hot water or vapor; neutralizations by alkali; steaming in vacuo
1602	Finished or tinned stocks from meat, the meat offal or the blood other	Production from materials of group 02 under condition of accomplishment of technological transactions: except for transactions on dressing, the boning, the zhilovka, cutting, mixing, including fowl of the mechanical boning, with spices (spices) and/or vegetable proteins, and/or I will merge, to salting of meat by the method of the shpritsevaniye, transactions on dressing of neobvalenny meat on the part, and also transactions on production of fowl of the mechanical boning
1701	Saccharum reed, either sveklovichny or chemically pure sucrose in solidity	Production from materials of any line items under condition of accomplishment of technological transactions on the klerirovaniye (for Saccharum reed), saturations, sulfitatsiya, filtering and the subsequent transactions (for Saccharum reed and sveklovichny)
1702 50	Fructose chemically pure;	Production from materials of any

000 0 1702 90 100 0	Maltose chemically pure	line items, including from other materials of the line item 1702
1806	Chocolate and the other ready foodstuff containing cocoa	Production from materials of any line items. However cost of used materials of the same line item, as the finished stock shall not exceed 50 % of the price of end products
1905	Bread, flour confectionery, cakes, cookies and the other bakery and flour confectionery containing or free of cocoa; wafer plates, the empty capsules suitable for use in the pharmaceutical purposes, wafer capsules for sealing, rice paper and similar products	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
2009	Juice fruit (including the must) and juice vegetable, nesbrozhenny and free of additives of alcohol, with addition or without addition of Saccharum or other sweetening substances	Production from materials of any line items. However cost of used materials of the same line item, as the finished stock shall not exceed 50 % of the price of end products
2101 12	Finished stocks on the basis of coffee of any line items	Production from materials of any line items. However cost of used materials of the same line item, as the finished stock shall not exceed 50 % of the price of end products
2101 30 910 0 (except 2101 30 110 0)	Extracts, essences and concentrates of the fried chicory	Production under condition of accomplishment of the main technological transactions: crushing; extraction or kontsentrirovaniye
2103 30 900 0	Mustard ready	Production from the mustard powder. Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
2106	Sugar syrups with addition aromatic or colorants	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products

2106 90 200 0	The compound spirituous semifinished products used for production of drinks	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
2204	Wine grape family natural, including the fortified; the must grape, except specified in the goods item 2009	Production from materials of any line items under condition of accomplishment of technological transactions on blending, filtering and other subsequent transactions. However cost of used materials of the line item 2204 shall not exceed 50 % of the price of end products
2205	Absinthiums and grape natural wines other with addition of plant or aromatic substances	Production from materials of any line items under condition of accomplishment of technological transactions on blending, filtering and other subsequent transactions. However cost of used materials of the same line item, as the product shall not exceed 50 % of the price of end products
2206 00	Drinks other dumped (for example, sidr, Perry, or sidr pear, drink honey); admixtures from the dumped drinks and the admixture of the dumped drinks and soft drinks, in other place not named or not included	Production from materials of any line items under condition of accomplishment of technological transactions on blending, filtering and other subsequent transactions
2208	Alcohol ethyl not denatured with concentration of alcohol less than 80 about. %; alcoholatures, liqueurs and other alcohol drinks:	Production from materials of any line items under condition of accomplishment of technological transactions on blending, filtering and other subsequent transactions. However cost of used materials of the same line item, as the product shall not exceed 50 % of the price of end products
2309	The products used for feeding of animals	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products

2403	The other industrially made tobacco and industrial substitutes of tobacco; homogenized or recovered tobacco; tobacco extracts and essences: – the smoking tobacco containing or free of substitutes of tobacco in any proportion	Production from materials of any line items. However cost of used materials of the line item 2403 shall not exceed 50 % of the price of end products
Group 25	Salt; sulfur; lands and stone; plaster materials, limestone and cement	Production from materials of any line items in the conditions of specialized production according to technology of processing/conversion; enrichment by coal, cleaning, pomolka of firm crystals, circumcision, calcination
2504	Graphite natural	Enrichment of carbon content, cleaning and crushing of raw materials
from 2515 12 000 0	Marble, travertin, sawn or parted by the different way on blocks or plates rectangular (including square) forms, thickness more than 4 cm, but no more than 25 cm	Pileniye or separation in a different way stone blocks in thickness more than 25 cm
2516	Granite, porphyry, basalt, sandstones the stone for monuments or construction other, raspingly shattered or not shattered, sawn or not sawn, or parted in a different way on blocks or plates pryamougolno (including square) forms	Pileniye or separation in a different way stone blocks
2518	Dolomite, kaltsinirovanny or not kaltsinirovanny, caked or not caked, including dolomite raspingly shattered or sawn, or parted in a different way on blocks or plates rectangular (including square) forms; dolomitic nabivochny admixture	Crushing, sawing, crushing; for not kaltsinirovanny dolomite - calcination
2519	Magnesium carbonate natural (magnesite); magnesia fused;	Production in case of which all used substances shall be classified

	magnesia burned before agglomeration (agglomerated), containing or free of the small amount of other oxides added before the sintering; other magnesium oxides, with impurity or without impurity	in the line item, distinct from the line item of the product, except natural magnesium carbonate (magnesite)
2524	Asbestos	Production from the asbestos mineral of asbestos (0-6)
2525	Mica, including the stratified; mica wastage	Splitting, cutting, crushing
2707 50 100 0	Admixtures of the aromatic hydrocarbons other, 65 about. which % or more (including losses) is ferried in case of to temperature to the 250th hail. With on the ASTM D 86 method for use in the fuel quality	Transactions on refining and/or one or several certain processings. Other transactions in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However the material of the same line item, as one product can be used in case of condition that its cost does not exceed 50 % of the price of end products
2709 00	Oil crude and oil products crude, received from bituminous breeds	Production from materials of any line items under condition of accomplishment of technological transactions on pyrogenic distillation of bituminous materials and destructive distillation of bituminous minerals
2710	Oil and the oil products received from bituminous breeds, except the crude; products, in other place not named or not included, containing 70 masses. % or more oil or the oil products received from bituminous breeds, and these oil products are the main components of products; the fulfilled oil products	Transactions on refining and/or one or several certain processings. Other transactions in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 50 % of the price of end products

2711	Gases oil and hydrocarbons the aeriform other	Transactions on refining and/or one or several certain processings. Other transactions in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 50 % of the price of end products.
2712	Vaselineum oil; paraffin, wax oil microcrystallic, gach paraffinic, the ozocerite, wax burougolny, wax peat, other mineral waxes and the similar products received as a result of synthesis or other processes, painted or unpainted	Transactions on refining and/or one or several certain processings. Other transactions in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 50 % of the price of end products
2713	Coke oil, bitumen oil and other remaining balance from petroleum refining or the oil products received from bituminous breeds:	Transactions on refining and/or one or several certain processings. Other transactions in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 50 % of the price of end products
2714	Bitumen and asphalt, natural; slates bituminous or petroliferous and sandstones bituminous; asphaltites and asphalt breeds	Transactions on refining and/or one or several certain processings. Other transactions in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 50 % of the price of

		end products
2715 00 000 0	Admixtures bitumen on the basis of asphalt rock, native bitumen, oil asphalt, breas or pitch of breas (for example, bitumastics, asphalt admixtures for pavings)	Transactions on refining and/or one or several certain processings. Other transactions in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 50 % of the price of end products
Group 28	Products of inorganic chemistry: bonds inorganic or organic precious metals, rare-earth metals, radioelements or isotopes, except products of podsubpozitsiya from 2811 29 100 0, 2818 20 000 0, 2821 20 000 0, 2833 22 000 0, for which applied rules are stated further	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item can be used provided that their cost does not exceed 20 % of the price of end products
from 2811 29 100 0	Sulfur oxide (VI) (sulphuric anhydride)	Production from sulfur dioxide
2818 20 000 0	Aluminum oxide, distinct from artificial corundum	Production from materials of any line items in the conditions of specialized production according to technology of conversion
2821 20 000 0	Paints earth (stains mineral)	Roasting or peremalyvaniye of earth colors
2833 22 000 0	Aluminum sulfate	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
Group 29	Organic chemical compounds, except bonds of line items from 2901, from 2902, 2905 19 100 0, 2915, 2932 99 300 0, 2932 99 700 0, 2933, 2934 for which applied rules are stated further	Production from materials of any line items in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided

		that their cost does not exceed 50 % of the price of end products
from 2901	Hydrocarbons acyclic	Transactions on refining and/or one or several certain processings. Other transactions in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However substances of the same line item, as the material, can be used provided that their cost does not exceed 50 % of the price of end products
from 2902	Hydrocarbons cyclic: - tsikloalkany, tsikloalkeny and tsikloterpeny	Transactions on refining and/or one or several certain processings. Other transactions in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However substances of the same line item, as the material, can be used provided that their cost does not exceed 50 % of the price of end products
2905 19 000 0	Alkogolyata of metals	Production from materials of any line item, including from other materials of the line item 2905. However alkogolyaty metals of this line item can be used provided that their cost does not exceed 50 % of the price of end products
2915	Acids acyclic monokarbonovy saturated and their anhydrases, galogenangidridy, peroxides and peroksikisloty; their galogenirovanny, sulfirovanny, nitrobathing or nitrozirovanny derivatives	Production from materials of any line items. However cost of used materials of line items 2915 or 2916 shall not exceed 50 % of the price of end products
from 2932 99 000 0	Internal ethers simple	Production from materials of any line items. However cost of used materials of the line item 2909

		shall not exceed 50 % of the price of end products
from 2932 99 000 0	Other cyclic acetals and internal gemiatsetali, containing or free of other kislordsoderzhashchy functional groups, and their galogenirovanny, sulfonirovanny, nitrobathing or nitrozirovanny derivatives	Production from materials of any line items, including from other materials of the line item 2932
2933	Bonds heterocyclic, containing only heteroatom (y) nitrogen	Production from materials of any line items. However cost of used materials of line items 2932 or 2933 shall not exceed 50 % of the price of end products
2934	Nucleic acids and their salts, certain or acritical chemical composition; heterogeneous ring compounds other	Production from materials of any line items. However cost of used materials of line items 2932, 2933 or 2934 shall not exceed 20 % of the price of end products
Group 30	Pharmaceutical products, except the goods of line items 3002, 3003, 3004, 3005 and 3006 60 for which applied rules are stated further	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product can be used provided that their cost does not exceed 70 % of the price of end products
3002	Blood human; the blood of animals prepared for use in the therapeutic, prophylactic or diagnostic purposes; Serums immune, fractions of blood the other and immunologic products which modified or have not been modified, including the biotechnologies received by methods; vaccines, toxins, cultures of microorganisms (except yeast) and similar products	Production from materials of any line items, including from other materials of the line item 3002. However materials of the line item 3002 can be used only provided that their cost does not exceed 50 % of the price of end products
3003	Pharmaceuticals (except the goods of the goods item 3002, 3005 or 3006), consisting of the admixture	Production from materials of any line items. However cost of used materials of the line item 3003

	of two or more components, for use in the therapeutic or prophylactic purposes, but not packed up in the form of the dosed medicinal forms or in forms or packagings for retail sale	shall not exceed 20 % of the price of end products
3004	Pharmaceuticals (except the goods of the goods item 3002, 3005 or 3006), consisting of the admixed or unmixed products, for use in the therapeutic or prophylactic purposes, packed up in the form of the dosed medicinal forms (including pharmaceuticals in the form of transdermalny systems) or in forms or packagings for retail sale	<p>Production in case of which cost of all used materials shall not exceed 70 % of the price of end products, and also under condition of accomplishment of technological transactions:</p> <p>in case of production of solutions for the injection in ampoules: the rastarivaniye, weighing, receipt of water cleared and waters for injections, preparation of solution, the external and internal flusher of ampoules, drying of ampoules, filling of ampoules, the zapaivaniye of ampoules, sterilization of ampoules, control of ampoules with solution of the preparation, marking and the primary package in boxes, group packaging in the box from the cardboard is sharp ampoules;</p> <p>in case of production of tablets by the method of the wet granulation: the rastarivaniye, crushing and the gap, weighing, preparation of the damper, mixing, the wet granulation, drying of mass for the tabletirovaniye, the dry granulation, dusting, the tabletirovaniye, the obespylivaniye, the primary package in the blister, group packaging in the box from the cardboard;</p> <p>in case of production of tablets in the psedoozhizhenny layer: the rastarivaniye, crushing and the gap, weighing, preparation of the</p>

		<p>damper, preparation of mass for the tabletirovaniye, drying, the dry granulation, dusting, the tabletirovaniye, the obespylivaniye, the primary package in the blister, group packaging in the box from the cardboard; in case of production of tablets by the method of compression molding: the rastarivaniye, crushing and the gap, weighing, mixing, the tabletirovaniye, the obespylivaniye, the primary package in the blister, group packaging in the box from the cardboard;</p> <p>in case of production of drawing of film coverings on tablets: the rastarivaniye, crushing and the gap, weighing, preparation of the damper, mixing, the wet granulation, drying of mass for the tabletirovaniye, the dry granulation, dusting, the tabletirovaniye, the obespylivaniye, deposition, the primary package in the blister, group packaging in the box from the cardboard;</p> <p>in case of production of kapsulirovanny medicinal forms: the rastarivaniye, crushing and the gap, weighing, preparation of the damper, mixing, the wet granulation, drying of mass for the tabletirovaniye, the dry granulation, dusting, filling of capsules, the primary package in the blister, group packaging in the box from the cardboard;</p> <p>in case of production of sterile powders: receipt of water cleared and waters for the injection, the</p>
--	--	---

		<p>rastarivaniye of materials of the primary package, the external and internal flusher of vials, sterilization of vials, preparation and the sterilization of jams dosed rassypka of the powder and corking of vials by rubber stoppers, corking of vials by aluminum caps, marking of vials, control of vials, the secondary package in the pack from the cardboard, group packaging in the box from the cardboard; in case of production of infusional solutions: the rastarivaniye, weighing, receipt of water cleared and waters for the injection, preparation of solution, marking of packets, filling and the zapaivaniye of packets, sterilization of packets with solution, control of packets with solution of the preparation, group packaging in the box from the cardboard</p>
3005	Cotton, gauze, bandage and similar products (for example, the dressing material, adhesive plasters, poultices), impregnated or covered with pharmaceutical substances either packed up in forms or packagings for retail sale, held for use in medicine, surgery, the odontology or the veterinary medicine	<p>Production from materials of any line items, except for pharmaceutical substances. However cost of used materials of the line item 3005 shall not exceed 50 % of the price of end products</p>
3006 60	Agents chemical contraceptive, made on the basis of hormones or spermitsidov	<p>Production from materials of any line items in case of which cost of all used materials shall not exceed 50 % of the price of end products</p>
Group 31	Fertilizers	<p>Production from materials of any line items in case of which used materials shall be classified in the line item, distinct from the line</p>

		item of the product. However materials of the same line item, as products, can be used provided that their cost does not exceed 50 % of the price of end products
Group 32	Extracts tannic or tinctorial; Tanninums and their derivatives; stains, pigments and other colorants; paints and varnishes; shpatlevka and other mastics; [printing ink], except products of line items from 3201, 3205 00 000 0 for which applied rules are stated further blackened	Production from materials of any line items in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 20 % of the price of end products.
from 3201	Extracts tannic plant origin; Tanninums and their salts, ethers simple and difficult and other derivatives	Production from extracts of tanning agents of the plant origin
3205 00 000 0	Color varnishes; preparations on the basis of the color varnishes, specified in the note 3 to this group	Production from materials of any line items, except for materials of line items 3203 and 3204 provided that cost of all materials, falling into line items 3205, does not exceed 20 % of the price of end products
Group 33	Essential oils and rezinoidy; perfumery, cosmetic or toilet agents, except products of the line item 3301 for which the applied rule is stated further	Production from materials of any line items. However cost of used materials of the same line item, as the finished stock, shall not exceed 40 % of the price of end products
3301	Oils ethereal (containing or free of terpenes), including konkrety and the absolutes; rezinoidy; ekstragirovanny essential oils; concentrates of essential oils in fats, fixed oils, waxes or the similar products, received by the method of the anfleurance or the maceration; terpenovy by-products of the deterpenizatsiya of essential oils; water distillates and water solutions	Production from materials of any line items, including from other materials of the same line item, using cleaning by special method under production conditions according to technology of conversion. However cost of used materials of the line item 3301 shall not exceed 50 % of the price of end products

	of essential oils	
Group 34	Soap, superficial active organic matters, scours, lubricants, artificial and ready waxes, structures for cleaning or polishing, suppositories and similar products, Pastas for the molding, plasticine, "dental surgery wax" and structures on the basis of the gypsum for the dental surgery purposes, except the goods of line items 3404 and from 3404 for which applied rules are stated further	Production in case of which all used dressing materials shall be classified in the line item, distinct from the line item of finished goods. However materials of the same line item can be used provided that their cost does not exceed 50 % of the price of end products. For soap: production from materials of any line items, under condition of accomplishment of technological transactions: the fatty set on the formula; cooking washed; mylosbornik; chilling and drying; machining; mixing with additives; machining; it is sharp; stamping; packaging.
3403	Materials lubricant (including lubricant lubricating fluids for cutting instruments, agents for simplification of the vyvinchivaniye of bolts or nuts, rust removers or antirust agents and preparations for simplification of dredging of products from the forms, made on the basis of greasings) and the agents used for oil or fatty processing of textiles, skins, fur or other materials, except the agents containing in quality of the main components of 70 masses. % or more oil or the oil products received from bituminous breeds	Production from materials of the same line item provided that their cost does not exceed 50 % of the price of end products
from 3404	Waxes artificial and ready waxes	Transactions on refining and/or one or several certain processings. Other transactions in which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided

		that their cost does not exceed 50 % of the price of end products
Group 35	Proteic matters; modified Amylums; glues; enzymes, except products of podsubpozitsiya 3505 10 500 0; 3505 10 900 0, from 3507 for which applied rules are stated further	Production from materials of any line items in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 20 % of the price of end products
3505 10 500 0	Amylums, esterified and eterifitsirovanny [turned in difficult or ether]	Production from materials of any line items, including from other materials of the line item 3505
3505 10 900 0	Modified Amylums other	Production from materials of any line items, except materials of the line item 1108
from 3507	Enzymes; ferment preparations, in other place not named or not included	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
Group 36	Explosives; pyrotechnic products; matches; piroforny alloys; some combustible substances	Production from materials of any line items in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 20 % of the price of end products
Group 37	Photo and the film goods, except products of line items 3701, 3702, 3704 00	Production from materials of any line items in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 20 % of the price of end products
3701	Photographic plates and films, flat, sensibilizirovanny, not exhibited,	Production in case of which all used materials shall be classified

	from any materials, except paper, the cardboard or textile; Membranulas flat for the instant photo, sensibilizirovanny, not exhibited, in packaging or unpacked	in the line item, distinct from line items 3701 and 3702
3702	Films in rollers, sensibilizirovanny, not exhibited, from any materials, except paper, the cardboard or textile; Membranulas for the instant photo in rollers, sensibilizirovanny, not exhibited	Production in case of which all used materials shall be classified in the line item, distinct from line items 3701 and 3702
3704 00	Photographic blades, Membranulas, paper, cardboard and the textiles exhibited, but not shown	Production in case of which all used materials shall be classified in the line item, distinct from line items 3701 and 3704 00
Group 38	Other chemical goods, except the line item 3801 20100 0, 3801 30 1000, from 3803 00, from 3805, 3806, 380630 000 0, from 380700, 3811 21 000 0, 3823 70 000 0, from 3824	Production, in case of which all used materials shall be classified in the line item, distinct from line items of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 20 % of the price of end products
3801 20 100 0	Pastas carbonaceous for electrodes and similar Pastas for the futirovka of furnaces	Production from materials of any line items in case of which cost of used materials of the line item 3403 shall not exceed 50 % of the price of end products
3801 30 000 0	Pastas carbonaceous for electrodes and similar Pastas for the futirovka of furnaces	Production from materials of any line items in case of which cost of used materials of the line item 3403 shall not exceed 50 % of the price of end products
from 3803 00	Oil tallovy, refined or not refined	Refining of crude oil
from 3805 10 900 0	Oil skipidarny sulphatic, cleared	Cleaning by distilling or refining of crude oil of the skipidarny sulphatic
from	Ether the difficult pitch	Production from

3806 90 000 0		smolosoderzhashchy acids
3806 30 000 0	Pitches slozhnoefirny	Production from smolosoderzhashchy acids
3807 00 900 0	Tar black (pitch or pitch from vegetative tar)	Distillation of wood tar
from 3824	Ready binding agents for production of foundry cores or foundry hinges; products and preparations chemical, chemical or allied industries of the industry (including the preparations consisting of admixtures of natural products), in other place not named or not included	Production in case of which all used materials shall be classified in the line item, distinct from line items of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed 50 % of the price of end products
3811 21 000 0	The lubricant dopes containing oil or oil products, received from bituminous minerals	Production in case of which cost of used materials of the line item 3811 shall not exceed 50 % of the price of end products
3823 70 000 0	Industrial fatty alcohol	Production from materials of any line items, including from fatty acids
from 3901 - 3915*	Polymers of ethylene in primary forms - the wastage, scraps and skrap, from plastic	Production, in case of which cost of all used materials not shall exceed 50 % of the price of end products. However cost of all used materials of group 39 shall not exceed 20 % of the price of end products
from 3916 - 3921	Monofilament with the size of the cross-section more than 1 mm, rods, hinges and profiles shaped, with the processed or raw surface, none undergone to other processing, from plastic - plates, sheets, Membranula and strips or tapes from plastic, other	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. However cost of all used dressing materials of group 39 shall not exceed 20 % of the price of end products
3920 10 250 0	Membranula, strips or tapes in thickness no more than 0,125 mm from polymers of	Production from materials of any line items. However cost of used materials of the same line item, as

	ethylene, with specific weight less than 0,94, with the printed drawing and the text, in rollers	the finished stock, shall not exceed 50 % of the price of end products
3920 10 280 0	Membranula, strips or tapes in thickness no more than 0,125 mm from polymers of ethylene, with the printed drawing and the text, with specific weight 0,94 or more, in rollers	Production from materials of any line items. However cost of used materials of the same line item, as the finished stock, shall not exceed 50 % of the price of end products
3920 20 210 0	Membranula, strips or tapes from polymers of the propylene, thickness no more than 0,10 mm biaksalno oriented, in rollers	Production from materials of any line items. However cost of used materials of the same line item, as the finished stock, shall not exceed 50 % of the price of end products
3926	Products other from plastic and the product from other materials of goods items 3901-3914	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
3926 30 000 0	Fixing products and fitment just for decoration, vehicles or similar products	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: - production of procurements; - machining of details
3926 90	Products other from plastic and the product from other materials of goods items 3901-3914, other	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: - production of procurements; - machining of details
4001	Rubber natural, the balata, gutta-percha, gvayula, chikl and similar natural resins, in primary forms or in the form of plates, sheets or strips, or tapes	Stratification of cut sheets
4005	Green rubber stock, in primary	Production in case of which cost

	forms or in the form of plates, sheets or strips, or tapes	of all used materials shall not exceed 50 % of the price of end products.
4009	Pipes, tubes and hoses from volcanic rubber, except firm rubber, without the fitting or with the fitting (for example, bonds, tubes, flanges)	Production, in case of which cost all used materials shall not exceed 50 % of the price of end products, under condition of accomplishment of the following transactions: - cutting of the hose; - cutting of muftovy bonds; - navinchivaniye of couplings; - hydraulic testing of hoses on the press
4011	Splints and tires the pneumatic rubber new	Production, in case of which cost of the used raw materials having identical goods item with the finished stock, shall not exceed 50 % of the price of end products
4015	Clothes and belongings to clothes (including gloves, mittens and mitts) from vulcanized rubber, except firm rubber, for the various purposes	Production from materials of any line items. However cost of used materials of the line item 4015 shall not exceed: - 80 % of the price of end products – in the first year from start date production of this type of the goods; 70 % of the price of end products - in the second year; 60 % of the price of end products in the third year; 50 % of the price of end products since the fourth year of production of this type of the goods. Under condition of accomplishment of the following transactions for sterile gloves: production of packaging; packing in the individual packaging in pairs; sterilization; check on sterility. Under condition of accomplishment of

		the following transactions for unsterile gloves: Hlorinatsiya or polymerization; production of packaging; packing in group packaging on 25-50 pairs (the polyethylene insert, cardboard box/isolation ward)
4017 00	Rubber firm (for example, ebonit) in all forms, including the wastage and skrap; products from firm rubber	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: - production of procurements; - machining of details
from 4101 - 4103	The raw skins of cattle (including the water buffalo) or animals of family horse (didymous or salty, dried, zoleny, pikelevanny or tinned in a different way, but not tanned, not manufactured under parchment or not subjected to further processing), with the coat or without the coat, dvoyeny or nedvoyeny - the other raw skins (didymous or salty, dried, zoleny, pikelevanny or tinned in a different way, but not tanned, not manufactured under parchment or not subjected to further processing), with the coat or without the coat, dvoyeny or nedvoyeny, except excluded by notes 16 or 1B to this group	Conversion of skins of animals by excision of the coat
from 4104 - 4107	Tanned skin or tanning krast from skins of cattle (including the water buffalo) or animals of family horse, without the coat, dvoyeny or nedvoyeny, but without further processing - the skin which has been in addition processed after the tanning or in the form of tanning krasta, including manufactured	Production of the skin from skins of the animals who have passed transaction of the tanning

	under parchment, from skins of cattle (including the water buffalo) or animals of family horse, without the coat, dvoyeny or nedvoyeny, except the skin of the goods item 4114	
from 4302	Tanned or dressed fur skins (including the heads, tails, pads and other parts or the flap), not collected or collected (without addition of other materials), except specified in the goods item 4303	Production from tanned or dressed fur skins not collected
4403	Forest products raw, with deleted or not the remote cortex or the sapwood or raspingly brusovanny or not the brusovanny	Production from the raw forest products, with the taken-out cortex or simply peeled
4407	Forest products sawn or split lengthways, divided into layers or the shelled, planed or unplaned, polished or unpolished, having or not having edge joints, thickness more than 6 mm	Sawing, planing, polishing, bonds in the thorn
4408	Sheets for facing (including received by separation of layered wood), for kleeny veneer or similar layered wood and the other forest products sawn lengthways, divided into layers or the shelled, planed or unplaned, polished or unpolished, having or not having edge joints, thickness no more than 6 mm	Bond (pasting), planing, polishing
4409	Timber (including levels and the frieze for parquet floor covering, not collected) in the form of profilirovanny pogonazha (with crests, grooves, shpuntovanny, with the cut-off edges, with bond in the form of the semicircular kalevka, shaped, rounded off or similar) on any of edges, end faces or the planes, the planed or unplaned, polished or unpolished, having or	Milling or profiling, polishing, or bond in the thorn, the sawing

	not having edge joints	
4414 00	Frames wooden for pictures, photos, mirrors or similar subjects	Profiling, milling, assembly
4416 00 000 0	Barrels, kegs, tubs, tubs and other bondarny products and their parts, from wood, including klepku	Production from klepki, even sawn round on two datum planes, but not processed differently
4418	Products joiner's and plotnitsky, wooden, construction, including honeycomb wooden panels, panels floor gathered, the shingle and the shingle the roofing	Production from forest products, and used materials shall be classified in the line item, distinct from the line item of the product. However honeycomb panels from the tree the shingle, the shingle can be used
4421	Products the wooden other	Production from the tree of any line item, except holtsdrata line items 4409
4802	Paper and cardboard nemelovanny, used for the letter, the seal or other graphical purposes, both nonperforated cards and nonperforated paper strips in rollers or rectangular (including square) sheets of any size, except paper of goods items 4801 or 4803; paper and cardboard of manual outflow	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: - installation of the roller on unwinding on processing equipment; - implementation transversal and slitting of the established format on processing equipment; - implementation of completing packs of the established format on processing equipment; - packaging on the conveyor
4810	Paper and the cardboard covered from one or from both parties with Kaolinum (the Chinese clay) or other mineral substances, with use of binding agent or without it, and without any other covering, with the painted or unpainted, decorated or not decorated surface, printed or not printed, in rollers or rectangular	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: - installation of the roller on unwinding on processing equipment;

	(including square) sheets of any size: - paper and the cardboard used for the letter, the seal or other graphical purposes, not containing the fibers received mechanical or chemical and mechanical methods, or with content of such fibers no more than 10 % from lump of the fiber	- implementation transversal and slitting of the established format on processing equipment
4817	Envelopes, cards for letters, post cards without drawings and the card for correspondence, from paper or the cardboard; boxes, bags, cases and kompendiumy, from paper or the cardboard, containing sets of the paper stationery	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However cost of all used materials shall not exceed 50 % of the price of end products
4819	Pieces of cardboard, boxes, boxes, sacks, packets and other packaging container, from paper, the cardboard, the cellocotton or the cloth from cellulose fibers; boxes for card-indexes, trays for letters and similar products, from paper or the cardboard, used in organizations, shops or in the similar purposes	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the goods. However cost of all used materials shall not exceed 50 % of the price of end products
5111	Tissues from the wool yarn of apparatus spinning or the yarn of apparatus spinning from the fine hair of animals	Under condition of accomplishment technological transactions: dashing about of the yarn according to the refueling calculation of the tissue, the shlikhtovaniye of the yarn, the proborka or the binding of the yarn on the loom, weaving, furnish of the tissue according to the technological regimen: otvarka-rasshlikhtovka, dyeing, final furnish, grading of the ready tissue
5112	Tissues from the wool yarn of grebenny spinning or the yarn of	Under condition of accomplishment

	grebenny spinning from the fine hair of animals	technological transactions: - dashing about of the yarn according to refueling calculation of the tissue, the shlikhtovaniye of the yarn, the proborka or the binding of the yarn on the loom, weaving, furnish of the tissue according to the technological regimen: otvarka-rasshlikhtovka, dyeing, final furnish, grading of the ready tissue
5208-5212	Tissues cotton, containing 85 masses. % or more cottonous fibers, with superficial density no more than 200 g/m ²	Under condition of accomplishment of technological transactions: - dashing about of the yarn according to refueling calculation of the tissue, the shlikhtovaniye of the yarn, the proborka or the binding of the yarn on the loom, weaving, furnish of the tissue according to the technological regimen: otvarka-rasshlikhtovka, bleaching, dyeing, seal of drawing, final furnish, grading of the ready tissue
from 5603	Sets and single products of medical disposable sterile linen from the bonded fabric of the line item 5603	Incoming inspection, flooring, open, having sewed (if necessary), sterilization, packaging, the day off control
5701	Nodous carpets and heavy-duty textile floor coating ready or not ready	Weaving, hairstyle of the cloth, dressing, covering of edges of products. Thus used materials shall be classified in the line item, distinct from line items 5702, 5703, 5704, 5705 00, and their cost shall not exceed 50 % of the price of end products
5702	Woven carpets and heavy-duty textile floor coating, netaftingovy or neflokirovanny, ready or not ready, including "Kiel", "bags", "Kerman"	Weaving, hairstyle of the cloth, dressing, covering of edges of products. Thus used materials shall be classified in the line item,

	and similar carpets of manual operation	distinct from line items 5701, 5703, 5704, 5705 00, and their cost shall not exceed 50 % of the price of end products
5705 00	Carpets and textile floor coverings other, ready or not the ready	Weaving, hairstyle of the cloth, dressing, covering of edges of products. Thus used materials shall be classified in the line item, distinct from line items 5701, 5702, 5703, 5704, and their cost shall not exceed 50 % of the price of end products
5801	Tissues nap and tissues from became blue, except tissues of the goods item 5802 or 5806	Under condition of accomplishment technological transactions: dashing about of the yarn according to refueling calculation of the tissue, the shlikhtovaniye of the yarn, the proborka or the binding of the yarn on the loom, weaving, furnish of the tissue according to the technological regimen: otvarka-rasshlikhtovka, napping, bleaching, dyeing, seal of drawing, final furnish, grading of the ready tissue
5802	Tissues terry polotenechny and similar terry tissues, except narrow tissues of the goods item 5806; taftingovy textiles, except products of the goods item 5703	Under condition of accomplishment of technological transactions: dashing about of the yarn according to refueling calculation of the tissue, the shlikhtovaniye of the yarn, the proborka or the binding of the yarn on the loom, weaving, furnish of the tissue according to the technological regimen: that is otvarka, washing, bleaching, dyeing, relaxation, grading of the ready tissue
Group 61	Subjects of clothes and belonging to clothes knitted machine or manual knitting	Production from the yarn of any line items under condition of accomplishment of technological

		<p>transactions:</p> <ul style="list-style-type: none"> - knitting manually or by the machine, finishing and thermal transaction
Group 62	Subjects of clothes and belonging to clothes, except knitted machine or manual knitting	<p>Production from tissues, fabrics and bonded fabrics of any line items under condition of accomplishment of technological transactions: the nastilaniye also open the material, completing, installation of details, assembly of the product, thermal processing, marking and cleaning of the product</p>
6301	Blankets and plaids road	<p>Under condition of accomplishment of technological transactions:</p> <ul style="list-style-type: none"> - dashing about of the yarn according to refueling calculation of the tissue, the emulsirovaniye of the yarn, the proborka or the binding of the yarn on the loom, weaving, furnish of the tissue according to the technological regimen, that is the otvarka, washing, napping, the decatizing, final furnish, open, the obmetyvaniye of the section, grading
6302	Linen bed, table, toilet and kitchen	<p>Production from tissues, fabrics and bonded fabrics of any line items under condition of accomplishment of technological transactions: - the nastilaniye also open the material, completing, installation of details assembly, thermal processing, marking and cleaning of the product</p>
6501 00 000 0 - 6506	Hat forms, hat procurements and caps from the felt, not formed, without fields; flat and cylindrical procurements (including with the	<p>Production from materials of any line items under condition of accomplishment of technological transactions: open, installation,</p>

	longitudinal section) from felt - headdresses other, lined or unlined either with furnish or without furnish	assembly, cleaning of the product
6601	Umbrellas and sun-protection umbrellas (including umbrella canes, garden umbrellas and similar umbrellas)	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
6802	The stone processed (except slate) for monuments or construction, and the product from it, except the goods of the goods item 6801; small cubes for the mosaic and similar products from the natural stone (including slate) on the basis or without the basis; granules, the crumb and the powder from the natural stone (including slate), artificially painted	Pileniye or separation in a different way
from 6803 00	Slate processed and products from slate or from the agglomerated slate	Production from the processed slate
from 6804, from 6805	Millstones, stones grinding, circles grinding and similar products without the basic designs, intended for the grinding, sharpening, polishing, adjustment or cutting, stones for manual sharpening or polishing and their part from the natural stone, from the agglomerated natural or artificial abrasives or from ceramics, assembled with details from other materials or without these details; the natural or artificial abrasive powder or grain on the woven, paper, cardboard or other basis cut or sewed, or the certain form processed in a different way for obtaining, or raw	Production from materials of any line item, except for materials of line items 6804 and 6805 and silicon carbides of the line item and 2849
from 6812	Fiber the asbestos processed; admixtures on the basis of asbestos or asbestos and magnesium	Production from the processed fibers of asbestos or from admixtures on the basis of

	carbonate; products from these admixtures or from asbestos (for example, filaments, tissues, clothes, headdresses, footwear, laying), reinforced or not reinforced, except the goods of the goods item 6811 or 6813	asbestos, or from admixtures on the basis of asbestos and the magnesium
from 6814	Mica processed and products from it, including the agglomerated or regenerated mica, on paper, cardboard or other basis or without it	Production from the processed mica (including the agglomerated or recovered mica)
7006 00	Glass of the goods item 7003, 7004 or 7005, bent, faceted, engraved, sverleny, enameled or processed by the different way, but not framed or not combined with other materials	Production from materials of the same line item under condition of accomplishment of the special technological transactions, providing to the finished stock of the characteristics, distinct from the used raw materials
7009	Mirrors glass, in frames or without frames, including mirrors of the back overview	Production from materials of any line items. However material cost of the same line item, as the finished stock, shall not exceed 50 % of the price of end products
from 7102 from 7103 from 7104	Diamonds processed or raw, but not put in order or loose; precious (except diamonds) and the semiprecious stones which processed or raw, sorted or unassorted, but have not been strung, not put in order or loose; unassorted jewels (except diamonds) and the semiprecious stones which have been temporarily strung as a matter of convenience of transportation; precious or semiprecious stones, artificial or reconstructed, processed or raw, sorted or unassorted, but not strung, not put in order or loose; the unassorted artificial or reconstructed precious	Production from precious or semiprecious stones (natural or reconstructed), raw

	or semiprecious stones which have been temporarily strung as a matter of convenience of transportation	
from 7106, from 7108, from 7110	Silver (including silver with the galvanic covering from gold or platinum), raw or semi-processed, or in the form of the powder; gold (including gold with the galvanic covering from platinum) raw or semi-processed, or in the form of the powder; platinum raw or semi-processed, or in the form of the powder	Production from the precious metals raw
from 7107 00 000 0 from 7109 00 000 0	Metals not precious, plated by the silver, semi-processed; metals not precious or the silver, plated by the gold, raw or semi-processed	Production from the plated metals raw
7111 00 000 0	Metals not precious, silver or the gold plated by platinum, raw or semi-processed	Electrolytic, chemical, thermal enrichment, splavka of metals
7116	Products from the natural or cultivated pearls, precious or semiprecious stones (natural, artificial or reconstructed)	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
7117	Costume jewellery: – from not precious metals which have or not having the galvanic covering from precious metals	Production from parts of not precious metals, not gilded, not silvered, not platinized provided that cost of all used materials does not exceed 50 % of the price of end products
from 7218	Steel corrosion-resistant in ingots or other primary forms; semifinished products from corrosion-resistant steel	Production from stainless steel in ingots or other primary forms of the line item 7218
from 7224, 7225, 7226, 7227	Steel alloyed in ingots or other primary forms the other; semifinished products from other alloy steels; hire flat from other alloy steels, width of 600 mm or	Production from other alloy steels in ingots or other primary forms of the line item 7224

	more; hire flat from other alloy steels, width less than 600 mm; rods hot-rolled in freely winded bays from other alloy steels	
7304	Pipes, tubes and profiles hollow, seamless, from ferrous metals (except pig-iron molding)	<p>Production in case of which cost of all used materials, the same line item, as the finished stock, shall not exceed 80 % of the price of end products in the first year of production after 2010 (irrespective of start date of production) under condition of accomplishment of the following transactions:</p> <ul style="list-style-type: none"> - cutting of muftovy thread connections; - navinchivaniye of couplings; - hydraulic testing of pipes; <p>- 70 % of the price of end products - in the second year, under condition of accomplishment of the following transactions:</p> <ul style="list-style-type: none"> - production/use of couplings of the Kazakhstan production, production/use of protectors of the carving of the Kazakhstan production; <p>- 60 % of the price of end products – in the third year, under condition of accomplishment of the following transactions:</p> <ul style="list-style-type: none"> - cutting of gazoplotny thread connections of the class "Premium"; <p>- 50 % of the price of end products - in the fourth year, under condition of accomplishment of the following transactions:</p> <ul style="list-style-type: none"> - drawing of the internal anticorrosive and gladkostny covering on casing pipes

7308	Metalwork from ferrous metals (except modular construction designs of the goods item 9406) and their parts (for example, bridges and their section, the collar of locks, the tower, trellised spar trees, overlappings for roofs, construction farms, doors and windows and their frames, thresholds for doors, the jalousie, balustrades, legs and columns); sheets, rods, corners, shaped profiles, pipes and similar products, from ferrous metals, held for use in the metalwork	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products, and also under condition of accomplishment of technological transactions: - procurement activities (it is sharp, milling, drilling); - the prikhvatka in the building berth; - welding semi-automatic; - shot blasting; - drawing of coverings (hot otsinkovaniye or painting by the enamel)
7308 90 510 0	The panels consisting of two walls, made of the goffered (ribbed) leaf with the insulating excipient	Production in case of which cost of all used materials shall not exceed 55 % of the price of end products, and also under condition of accomplishment of technological transactions: - cutting of the heater; - stacking of materials on automatic transfer line; - production of panels on automatic transfer line
7309	Reservoirs, tanks, tanks and similar reservoirs from ferrous metals for any substances (except compressed or condensed gas) capacity more than 300 l, with facing or the heat insulation or without them, but without the mechanical or heattechnical equipment	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: - production of procurements; - machining of details; - assembly and welding transactions; - general installation with carrying out testing on available methodical instructions and control of the technical parameters pledged in design documentation
7311 00	Reservoirs for compressed or	Production in case of which cost

990 0	condensed gas from ferrous metals, other, capacity of 1000 l or more	of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: - production of procurements; - machining of details; - assembly and welding transactions; - general installation with carrying out testing on available methodical instructions and control of the technical parameters pledged in design documentation
7312	The braided wire, cables. Ropes, wattled cords, hoisting slings and similar products, from ferrous metals, without electric isolation	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. However cost of used materials of the same line item, as the finished stock, shall not exceed 15 % of the price of end products
from 7314	Lattices, grids and the barriers welded in places of crossing, other	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products, and also under condition of accomplishment of technological transactions: - procurement activities (it is sharp, milling, drilling); - welding and assembly transactions; - painting
from 7322	Radiators for the central heating with not electric heating and their parts, from ferrous metals; air heaters and switching centers for feed of hot air (including the pay-off also fresh or conditioned air) with not electric heating, equipped with the built-in fan or the blower with the engine drive and their	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However materials of the same line item, as the product, can be used provided that their cost does not exceed the amount within 5 % of the price of end products

	parts, from ferrous metals	
7323 99 990 0	Products for household needs from ferrous metals other (garbage eurocontainers)	Production in case of which cost of all used materials shall not exceed 40 % of the price of end products, and also under condition of accomplishment of technological transactions: <ul style="list-style-type: none"> - cutting of procurements; - stamping; - assembly; - cooking; - drawing of coverings (hot otsinkovaniye or painting by the enamel or powder dusting); - assembly
7326 90 980 9	Containers under ammunition	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: <ul style="list-style-type: none"> - production of procurements (it is sharp by lentochtopilny machines, open by the gazoplazmennyy machine, the shoeing); - machining of details; - heat treatment of details; - assembly and welding transactions on production of case details and their machining; - assembly and testing of separate nodes; - general installation with carrying out power testing on the methodical instructions received from the customer and control of the technical parameters pledged in design documentation
Group 74	Copper and products from it, except products of line items 7401-7405	Production in case of which all used materials shall be classified in the line item, distinct from the

		line item of the product. However cost of all used materials shall not exceed 50 % of the price of end products
from 7403	Copper refined and alloys the copper raw	Production from the refined copper raw or from the wastage and the breakage
Group 75	Nickel and products from it, except products of line items 7501-7503	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However cost of all used materials shall not exceed 50 % of the price of end products
Group 76	Aluminum and products from it, except products of line items 7601-7603	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However cost of all used materials shall not exceed 50 % of the price of end products
Group 78	Lead and products from it, except products of the line item 7802 00 000 0	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However cost of all used materials shall not exceed 50 % of the price of end products
Group 79	Zincum or products from it, except products of the line item 7902 00 000 0	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However cost of all used materials shall not exceed 50 % of the price of end products
Group 80	Tin and products from it, except products of the line item 8002 00 000 0	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However cost of all used materials shall not exceed 50 % of the price of end

		products
from group 81	Other not precious metals; ceramic-metal; products from them	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. However cost of all used materials shall not exceed 50 % of the price of end products
8208	Knives and cutting edges for machines or mechanical adaptations	Production from materials of any line items. However cost of used materials of the same line item, as the finished stock, shall not exceed 50 % of the price of end products
8307	Pipes flexible from not precious metals with the fitting or without them	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products, under condition of accomplishment of the following transactions: - matching of procurement on parameter; - cutting of the pipe; - matching of blooming rings under diameter; - welding of trailer armature and pipe; - polishing of joint welds; - assembly of the product; - hydraulic testing at the stand
Group 84	Reactors nuclear, boilers, the equipment and mechanical devices, their parts, except the products which are falling into following line items for which applied rules are stated further: 8403, 8404, 8406, 8407, 8408 except 8408 90 850 0, 8408 90 850 0, 8412, 8414, 8415, 8418, 8419 40 000, 8419 50 000, 8419 89, 8419 90, 8421, 8425-8430, 8432 30, 8433 except 8433	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. In the above-stated limit the materials classified in the same line item, as the product, can be used only to the amount in the limit of 5 % of the price of end products

	51 000 9, 8433 59 110 9, 8433 59 850 9, 8444-8447, 8448, 8450, 8452, 8456-8466, 8469-8472, 8471, 847421 000 0, 8480, 8484, 8485	
8403	Boilers of the central heating, except boilers of the goods item 8402	Production in case of which the percentage share of value added shall constitute at least 50 % of the price of end products
8404	Accessory equipment for use with boilers of the goods item 8402 or 8403 (for example, ekonomayzer, paroperegrevatel, sazheudalitel, gas recuperators); condensers for steam-and-water or other steam power plants	Production in case of which the percentage share of value added shall constitute at least 50 % of the price of end products
8404 10 000 0	Accessory equipment for use with boilers of the goods item 8402 or 8403	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: - production of procurements; - machining of details; - assembly and welding transactions
8406	Turbines on water pair and turbines the steam other	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8407	Internal combustion engines with the spark sparking rotating or back and forth motion of the piston	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8408	Internal combustion engines piston with ignition from compression (diesels or semi-diesels), except machines of the goods item 8408 90 850 0	Production in case of which cost of used nodes and details shall not exceed in the first year from start date of production of this type of the goods of 90 % of the price of end products; in the second year – 85 % of the price of end products,

		<p>and also under condition of accomplishment of technological transactions:</p> <ul style="list-style-type: none"> - machining of casting of the case of the water pump; - machining of casting of the pulley of the water pump; - production of the shaft of the water pump from hire; - machining of casting of the krylchatka of the water pump; - assembly and testing of the water pump; - installation of the water pump; - testing and painting of the drive; <p>in the third year – 80 % of the price of end products, and also under condition of accomplishment of technological transactions:</p> <ul style="list-style-type: none"> - machining of casting cases of the water pump; - machining of casting of the pulley of the water pump; - production of the shaft of the water pump from hire; - machining of casting of the krylchatka of the water pump; - assembly and testing of the water pump; - installation of the water pump; - machining of casting of the case of the lube pump; - machining of casting of the cover of the lube pump; - production of gear wheels of the lube pump from hire; - machining of the forging of the gearwheel of the lube pump; - production of valves of the lube pump from hire; - assembly and testing of the lube pump; - installation of the lube pump;
--	--	---

		- testing and painting of the drive
8408 90 850 0	Drives new, capacity more than 1000 kw, but no more than 5000 kw	<p>Production in case of which cost of all used materials shall not exceed in the first year from start date of production of this type of the goods – 95 % of the price of end products;</p> <p>in the second year – 90 % of the price of end products;</p> <p>in the third year – 85 % of the price of end products;</p> <p>in the fourth year – 80 % of the price of end products;</p> <p>the fifth year – 70 % of the price of end products, under condition of accomplishment of the following technological transaction: production, picking, assembly of the hinged equipment: (radiators, electric cables, air and fuel filters)</p>
8411	Drives turbojet and turbo-propeller, gas turbines other	<p>In the first year from start date production of this type of the goods of 90 % of the price of end products, and also under condition of accomplishment of technological transactions: production, assembly and installation:</p> <ul style="list-style-type: none"> - the soundproofing casing; - systems of ventilation of the soundproofing casing; - the air duct for air delivery to the burning area; - systems of the exhaust of the fulfilled gases; - electrician of the upper part of the turbine; - the trailer panel of the soundproofing casing; - primary filling by grease oil; <p>in the second year - 85 % of the price of end products, and also</p>

		<p>under condition of accomplishment of technological transactions: production, assembly and installation:</p> <ul style="list-style-type: none"> - the soundproofing casing; - systems of ventilation soundproofing casing; - the air duct for air delivery to the burning area; - systems of the exhaust of the fulfilled gases; - electrician of the upper part of the turbine; - the trailer panel of the soundproofing casing; - systems of purification of air for feed to the burning area; - tubal band of feed and - return of grease oil; - tubal band of the module - automatic drainage; - tubal band of the module of fuel gas; - tubal band of the starting drive; - tubal band of grease oil; - tubal band of chilling of air; - primary filling by grease oil; - painting; carrying out testing: - the tubal band of grease oil (washing and check on the leakage); - the tubal band of the module of fuel gas (check on the estrus); - the tubal band of the module of the automatic drainage (check on the leakage); <p>in the third year - 75 % of the price of end products, and also under condition of accomplishment of technological transactions:</p> <ul style="list-style-type: none"> - production of special tools (cargo traverse (50 t.) / one on the compressor station, the trolley of

8448	The equipment auxiliary for use with machines of the goods item	Production in case of which cost of all used materials shall not

	8444, 8445, 8446 or 8447 (for example, remizopodjemny carriages, jacquard machines, automatic mechanisms ostanova, mechanisms of change of dugout boats); parts and the accessories intended only or generally for machines of this goods item or the goods item 8444, 8445, 8446 or 8447 (for example, spindles and rogulki, the needle font, crests, filyer, dugout boats, remizki and remizny frames, knitted needles)	exceed 50 % of the price of end products
8450	Washing machines	Production from materials of any line items under condition of accomplishment of technological transactions: - production of elements of the case; - production of the pay of management; - production of elements of electroposting; - assembly and installation of blocks; - resetting and control of parameters
8452	Machines sewing, except machines for ligation of book blocks of the goods item 8440; furniture, the bases and the cases intended specially for sewing machines; needles for sewing machines	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8456-8466	Machines for processing of any materials by excision of the material by means of laser or other light or photon ray, ultrasonic, electrodigit, electrochemical, electron radial, ion-radial or plasma and arc processes – parts and the accessories intended only or generally for the equipment of	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products

	goods items 8456-8465, including adaptations for fixture of the tool or the details, self-revealing thread-cutting heads, dividing heads and other special adaptations to machines; adaptations for fixture of working tools for all types of hand tools	
8469 00 - 8472	Machines writing, except printers of the goods item 8443; devices for processing of texts - the equipment office (for example, hectographic or traforetny duplicating machines, machines address, automatic devices for issue of banknotes, machines for sorting, calculation or packaging of coins, the machine for sharpening of pencils, punched machines or machines for the fastening stirrups) other	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8471	Computers and their blocks; magnetic or optical slots, machines for data transfer on data carriers in the coded form and machines for processing of similar information, in other place not named or not included	<p>Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, under condition of accomplishment of technological transactions:</p> <ul style="list-style-type: none"> - configuring and setup of computer facilities; - installation in the case of the following the functional nodes: the systemic pay, electrical power unit and other components entering into the configuration of computer facilities; - incoming inspection of assembly elements; - ON installation and testing of computer facilities, including accomplishment of complex test of check of operability of the computer with preserving the received results

8474 32 000	Machines for mixing of mineral substances with bitumen (asfaltobetonny plants)	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: production of procurements (it is sharp by lentochнопilny machines, open by the gas-flame machine) machining of details; assembly and welding transactions on production of case details and their machining; assembly and testing of separate nodes; general installation of installations and commissioning with carrying out power testing on available methodical instructions and control of the technical parameters pledged in design documentation
8480	Opoki for metal foundry production; foundry pallets; models foundry; casting molds of metals (except molds), carbides of metals, glass, mineral materials, rubber or plastic	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8484	Laying and the similar coupling from sheet metal in the combination to other material or consisting of two or more layers of metal; sets or sets of laying and the similar coupling, various on the structure, packed into packets, envelopes or similar packaging; mechanical seals	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8485	The parts of the equipment which do not have electric bonds, insulators of contacts, coils, wires or other electric details, in other place not named	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products

Group 85	Electric machines and equipment, their parts; sound recording and sound-reproducing equipment, equipment for record and procreation of the television image and the sound, their part and accessory, except the goods of the following line items for which applied rules are stated further: 8501, except 8501 51-8501 53, 8501 51-8501 53, 8502, 8507, 8518, 8519-8521, 8523-8528, 8535-8537, 8541 40 900 9, 8542, 8544, 8545	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. In the above-stated limit the materials classified in the same line item, as the product, can be used only to the amount within 10 % of the price of end products
8501	Drives and generators electric (except electrogenerator plants), except machines of products 8501 51-8501 53	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. In the above-stated limit materials of the line item 8503 can be used only to the amount within 10 % of the price of end products
8501 51-8501 53	Drives of the alternating current the polyphase: the other	<p>Production in case of which cost of used materials and accessories shall not exceed in the first year from start date of production of this type of the goods – 95 % of the price of end products under condition of accomplishment of the following technological transactions:</p> <ul style="list-style-type: none"> - production of tests on incoming inspection of quality of packets of the stator assembled with the bed; - laying of greasing; - installation of the rotor assembled on the drive; - installation of bearing boards on the drive; - installation of the krylchatka of the fan; - installation of the deflector of the fan; - installation of the box of

		<p>breedings to the drive;</p> <ul style="list-style-type: none"> - production of output tests on the test stand according to regulations; - production shield; - installation shield; - production of packaging and packaging of finished goods; - transactions on processing, separation and waste recycling of production. <p>In the second year – 90 % of the price of end products under condition of accomplishment of the following technological transactions:</p> <ul style="list-style-type: none"> - production of tests on incoming inspection of quality of packets of the stator assembled with the bed; - laying of greasing; - installation of the rotor assembled on the drive; - installation of bearing boards on the drive; - installation of the krylchatka of the fan; - installation of the deflector of the fan; - installation of the box of breedings to the drive; - production of output tests on the test stand according to regulations; - production shield; - installation shield; - production of packaging and packaging of finished goods; - transactions on processing, separation and waste recycling of production; - installation of inspissations of the spew way; - assembly of the terminal block. <p>In the third year – 85 % of the</p>

8502	Electrogenerator plants and rotating electric converters	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. In the above-stated limit materials of line items 8501 or 8503 can be used only to the amount within 10 % of the price of end products
8507	Accumulators electric, including separators for them, rectangular (including square) or other form	Production from materials of any line items. However cost of used materials of the same line item, as the finished stock, shall not exceed 50 % of the price of end products
8508	Vacuum cleaners	<p>Production from materials of any line items under condition of accomplishment of technological transactions:</p> <ul style="list-style-type: none"> - production of the case, production of elements of electroposting; - assembly and installation of blocks; - resetting and control of

		parameters
8515	Machines and apparatus for electric (including with electric heating of gas), laser or other light or photon, ultrasonic, electron beam, magnetic and impulsive or plasma and arc low-temperature soldering, the high-temperature soldering or welding irrespective of, whether they can carry out transactions of cutting or not; machines and the apparatus electric for the hot dusting of metals or the ceramic-metal	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. In the above-stated limit the materials classified in the same line item, as the product, can be used to the amount within 85 % of the price of end products
8516 50 000 0	Furnaces microwave	Production from materials of any line items under condition of accomplishment of technological transactions: - production of the case, production of elements of electroposting; - assembly and installation of blocks; - resetting and control of parameters
8517	Apparatus telephone, including the apparatus telephone for cellular communication networks or other wireless communication networks; other equipment for transfer or acceptance of the voice, images or other data, including equipment for communication in the network of the wire or wireless communication (for example, in the local or global communication network), except transferring or reception equipment of the goods item 8443, 8525, 8527 or 8528	Production from materials of any line items under condition of accomplishment of technological transactions: - assembly and installation of electron components; - production of elements of cable products; - mechanical assembly of the product; - record of the software; - resetting and control of parameters; - complex testing
from 8518	Microphones and supports for them; the loudspeakers which mounted or have not been mounted	Production in case of which cost of all used materials shall not exceed 50 % of the price of end

	in cases; earphones and phones head, incorporated or not incorporated with the microphone, and the sets consisting of the microphone and one or more loudspeakers; electric amplifiers of sound frequency; электрические sound intensifying sets	products. In the above-stated limit the materials classified in the same line item, as the product, can be used only to the amount within 5 % of the price of end products
8519	Equipment sound recording or sound-reproducing	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8521	Equipment video writing down or video reproducing, combined or not combined with the video tuner	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8521 90 000 1	DVD players	Production from materials of any line items under condition of accomplishment of technological transactions: production of the case, production of elements of electroposting; assembly and installation of blocks; resetting and control of parameters
8523	Disks, tapes, solid-state non-volatile devices of data storage, "intellectual cards" and other carriers for the sound recording or other phenomena, written down or not written down, including matrixes and master disks for production of disks, except products of group 37	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8525	Equipment transferring for broadcasting or the television, including or not including in the structure reception, sound recording or sound-reproducing equipment; television cameras, digital cameras and writing-down	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products

	video cameras	
8526	Equipment radar-tracking, radio navigation and radio equipment of distance steering	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8527	Equipment reception for the broadcasting, combined or not combined in one case with sound recording or sound-reproducing equipment or hours	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. In the above-stated limit materials of the line item 8529 can be used only to the amount within 10 % of the price of end products
8528	Monitors and the projectors which are not including in the structure reception television equipment; equipment reception for the television communication, including or not including in the structure the broadcasting radio receiver or the equipment writing down or reproducing the sound or the image	Production from materials of any line items under condition of accomplishment of technological transactions: <ul style="list-style-type: none"> - production of the chassis (procurement of radioelements, SMD installation, installation of all radioelements on printed-circuit boards, the soldering, diagnosis, resetting, control); - production of case details (injection molding, painting and armirovka of case details of the TV); - finishing assembly and resetting (assembly, installation, resetting, control, complex of testing (regulations) of end products)
8528 72 200 1	With the liquid crystal or plasma screen	Production from materials of any line items under condition of accomplishment of technological transactions: <ul style="list-style-type: none"> - production of the case, production of elements of electroposting; - assembly and installation of blocks; - resetting and control of parameters
8535,	Equipment electric for switching or	Production in case of which cost

8536	protection of electric chains or for connections to electric chains or in electric chains (for example, switches, switches, interrupters, fuses, lightning arresters, limiters of the strain, quenchers of power surges, current collectors, slip rings and other connectors, junction boxes) on the strain more than 1000 In; equipment electric for switching or protection of electric chains or for connections to electric chains or in electric chains (for example, switches, switches, interrupters, the relay, fuses, quenchers of power surges, plug forks and rosellas, cartridges for electrolamps and other connectors, junction boxes) on the strain no more than 1000 In; connectors for fibers of optical, fiber-optic garrots or cables	of all used materials shall not exceed 50 % of the price of end products. In the above-stated limit materials of the line item 8538 can be used only to the amount within 5 % of the price of end products
8537	Panels, panels, consoles, tables, switchboards and the bases for electric equipment other, equipped with two or more devices of the goods item 8535 or 8536 for management or distribution of the electric current, including including devices or devices of group 90 and digital management personnels, except switches of the goods item 8517	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. In the above-stated limit materials of the line item 8538 can be used only to the amount within 5 % of the price of end products
8539	Filament lamps electric or gas-discharge, including lamps hermetic the directional light, and also ultraviolet or infra-red lamps; arc lamps	Production in case of which cost of used materials (details) shall not exceed in the first year from start date of production of this type of the goods of 70 % of the price of end products, in the second year and the next years - 60 % of the price of end products, and also under condition of accomplishment of technological

		<p>transactions:</p> <ul style="list-style-type: none"> - assembly on the conveyor; - fixation of the socle by the shrinkable machine; - the soldering on the conveyor; - testing on the testing conveyor; - production of the electron ballast; - marking by the machine of the tamponny seal; - packaging on the conveyor
8541 40 900 9	Photo-electric module (solar batteries)	<p>Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, under condition of accomplishment of the following technological transactions:</p> <ul style="list-style-type: none"> - creation of garlands from polycrystalline cells (solar elements); - quality control of garlands; - repair of the garlands rejected during control; - inspection, preparation and stacking of the copper splint; - bond among themselves copper splints; - initial electrofluorescent test; - stacking of the glass-fiber mat, etilenvinilatsetatny Membranula and leaf of the polymeric layer; - lamination (thermal agglomeration); - cutting of edges; - installation of the distribution box; - control on the simulator of sunlight; - semi-automatic installation of the frame; - testing of resistance of isolation; - final electrofluorescent test; - inspection and unloading of the ready module.

8542	Schemes the electron integrated	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products. In the above-stated limit materials of line items 8541 and 8542 can be used only to the amount within 5 % of the price of end products
8544	Wires isolated (including enameled or anodized), cables (including coaxial cables) and other isolated electric conductors with dutchmans or without them; cables fiber optical, constituted from fibers with individual covers irrespective of, there are they or not assembled with electroconductors and or dutchmans	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8545	Electrodes coal, coal brushes, coals for lamps or batteries and the product from graphite or other types of Carboneum with metal or without metal, other, applied in the electrician	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
8601	Railway locomotives with the delivery from the external source of the electric power, or battery rooms	<p>Production of this type of the goods in case of which cost of used nodes and details shall not exceed in the first year of production of this type of the goods of 99 % of the price of end products, under condition of accomplishment of the following technological transactions:</p> <ul style="list-style-type: none"> - stationary testing of the electric locomotive; - dynamic tests of the electric locomotive. <p>In the second year – 95 % of the price of end products, under condition of accomplishment of the following technological transactions:</p> <ul style="list-style-type: none"> - stationary testing of the electric

8803	Parts of aircraft of the goods item 8801 or 8802	Production in case of which cost of all used materials of the line item 8803 shall not exceed 5 % of the price of end products
8804 00 000 0	Parachutes (including managed parachutes and paraplanes) and rotozhyuty; their parts and accessory	Production from materials of any line item, including from other materials of the line item 8804 00 000 0. Production, in case of which cost of used materials of the line item 8804 00 000 0 shall not exceed 5 % of the price of end products
8805	The starting equipment for aircraft; deck brake or similar devices; land exercise machines for flight structure; their parts	Production in case of which cost of used materials of the line item 8805 shall not exceed 5 % of the price of end products
8805 10	The starting equipment for aircraft and its part; deck brake or similar devices and their parts	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions: - production of procurements (it is sharp on tenial pilnykh machines, open by the gazoplazmenny machine, the shoeing); - machining of details; - heat treatment of details; - assembly and welding transactions on production of case details and their machining; - assembly and power testing of separate nodes; - general installation of installations with carrying out power testing on the methodical instructions received from the customer and control of the technical parameters pledged in

		design documentation
Group 89	Vessels, boats and floating designs	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product, however cases of courts of the line item 8906 00 cannot be used
Group 90	Tools and apparatus optical, photographic, cinema, measuring, control, precision, medical or surgical; their parts and accessory	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
9022	The equipment based on use of x-ray, alpha, beta or the gamma radiation, intended or not intended for medical, surgical, stomatologic or veterinary use, including equipment radiographic or radiotherapeutic, X-ray tubes and other generators of x-ray emission, generators of high tension, boards and operating consoles, screens, tables, chairs and similar products for inspection or treatment	Production in case of which cost of all used materials shall not exceed 70 % of the price of end products
Group 91	Hours of all types and their part	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
Group 92	Tools musical; their parts and accessory	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
Group 93	Weapon and ammunition; their parts and accessory	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
9301 10 000 0	Weapon artillery (for example, pappus, howitzers and mortars) the self-propelled	Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions:

		<ul style="list-style-type: none"> - production of procurements (it is sharp by lentochNOPilny machines, open by the gazoplazmennyy machine, the shoeing); - machining of details; - heat treatment of details; - assembly and welding transactions on production of case details and their machining; - assembly and testing of separate nodes; - general installation of installations with carrying out power testing on the methodical instructions received from the customer and control of the technical parameters pledged in design documentation
9301 20 000 0	Rocket launchers: flame throwers, grenade launchers, torpedo tubes and similar launchers	<p>Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions:</p> <ul style="list-style-type: none"> - production of procurements (it is sharp by lentochNOPilny machines, open by the gazoplazmennyy machine, the shoeing); - machining of details; - heat treatment of details; - assembly and welding transactions on production of case details and their machining; - assembly and testing of separate nodes; - general installation of installations with carrying out power testing on the methodical instructions received from the customer and control of the technical parameters pledged in design documentation

9301 90 000 0	The other military weapon, except rocket launchers	<p>Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of technological transactions:</p> <ul style="list-style-type: none"> - production of procurements (it is sharp by lentochopilny machines, open by the gazoplazmennyy machine, the shoeing); - machining of details; - heat treatment of details; - assembly and welding transactions on production of case details and their machining; - assembly and testing of separate nodes; - general installation of installations with carrying out power testing on the methodical instructions received from the customer and control of the technical parameters pledged in design documentation
9306 90	Bombs, grenades, torpedoes, mines, missiles and similar agents for conducting combat operations, their parts; cartridges, other ammunition, shells and their parts, including fraction also radiate for cartridges the other	<p>Production in case of which cost of all used materials shall not exceed 80 % of the price of end products, and also under condition of accomplishment of the following technological transactions:</p> <ul style="list-style-type: none"> - machining of details; - assembly and power testing of separate nodes; - general installation of products with carrying out power testing on the methodical instructions received from the customer and control of the technical parameters pledged in design documentation
9401	Furniture for sitting (except specified in the goods item 9402),	Production in case of which cost of all used materials shall not

	transformed or not transformed to beds, and its parts	exceed 50 % of the price of end products
9403	Furniture other and its parts	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
9405	Lamps and the lighting equipment, including searchlights, lamps of uzkonapravlenny light, the headlight and their part, in other place not named or not included; light signs, light plates with the name or the name, or the address and the similar products having the built-in light source, and their parts, in other place not named or not included	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
9406 00	Modular construction designs	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
9503 00	Tricycles, skateboards, pedal cars and similar toys on wheels; carriages for dolls; dolls; other toys; models in the reduced size ("in scale") and similar models for the entertainments, operating or invalid; puzzles of all types	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product, cost of all used materials shall not exceed 50 % of the price of end products
from 9602 00 000 0	The processed materials of the plant or mineral origin suitable for the carving, and product from them; products formed or carved from wax, the stearine, natural pitches or plant rubber or modeling Pastas, and the other formed or carved products, in other place not named or not included; gelatin processed, neotverzhdenny (except gelatin of the goods item 3503) and products from neotverzhdenny gelatin	Production from the processed materials for the carving of the same line items

from 9603	Sweepers, brushes (including the brushes being parts of mechanisms, devices or vehicles), brushes manual mechanical without drives for harvesting of floors, the mop and the brush from feathers for the smakhivaniye of the dust; nodes and the fascicles prepared for production of sweepers or brush products; cushions and rollers malar for paint; rubber mops (except rubber bowls for abstraction of moisture)	Production in case of which cost of all used materials shall not exceed 50 % of the price of end products
9605 00 000 0	Sets road, used for personal hygiene, sewing or cleaning of clothes or footwear	Each product entering into the set, shall satisfy to the demand which would be applied to it if it did not enter into the set. However products without the parentage can be a part of the set provided that their total cost does not exceed 15 % of the price of end products
9606	Buttons, buttons, fasteners latches, forms for buttons and other parts of these products; procurements for buttons	Production in case of which all used materials shall be classified in the line item, distinct from the line item of the product. Cost of all used materials shall not exceed 50 % of the price of end products
9608	Handles ball-type; handles and markers with the handpiece from felt and other sponges; pens ink, stilograf and handles other; feathers copy; pencils with the pushed-out or slipping hinge; holders for feathers, holders for pencils and similar holders; parts (including caps and clamps) the products listed above, except products of the goods item 9609	Production from the materials, falling into line items, distinct from the line item of the product. However feathers and handpieces for feathers can be used as well as other materials of the same line item, as the product which can be used, in turn, only provided that its cost does not exceed 5 % of the price of end products
9614 00	Tubes smoking (including cotyloid parts), bridles for cigars or cigarets, and their parts.	Production from rasping procurements of tubes

Notes:

* If the product is made of the materials relating at the same time to line items of 3901-3906 and 3907-3911, this provision is applied only to that category of products which prevails in the weight relation in the made goods.

** These criteria of sufficient conversion of the goods are applied to the goods of line items 8703, 8706, 8707, made only within implementation of large-scale investment projects. Thus the large-scale investment project is understood as the project on creation or development of production capacities for release of modern agents of the road transport and the automobile components, performed by the legal entity investing in fixed capital at least 2 billion tenge on start date of production of the goods. It is necessary to confirm amount of the investment with the audit report.

*** These criteria of sufficient conversion of the goods are applied to the goods of line items 8702, 8704, 8705, made only within implementation of large-scale investment projects. Thus the large-scale investment project is understood as the project on creation or development of production capacities for release of modern agents of the road transport and the automobile components, performed by the legal entity investing in fixed capital at least 0,5 billion tenge on start date of production of the goods. It is necessary to confirm amount of investments with the audit report.

**** These criteria of sufficient conversion of the goods are applied to the goods of line items 8802 12 000 0, made only within implementation of large-scale investment projects. Thus the large-scale investment project is understood as the project on creation or development of production capacities for production of the helicopters, performed by the legal entity investing in fixed capital at least 0,5 billion tenge on start date of production of the goods. It is necessary to confirm amount of investments with the audit report.

Note 1:

1.1. In the first two columns of these criteria of sufficient conversion of the goods data on the product received as a result of conversion of raw materials or materials are specified. In the first column of criteria of sufficient conversion of the goods the product code on TN foreign trade activities TS, is given in the second - the product description according to the code specified in the first column. For each specific product described in the first two columns, the condition, the production or technological operations determining its parentage, (further - conditions and transactions) are specified in the third column.

The goods in criteria of sufficient conversion of the goods are determined only by the commodity code by TN foreign trade activities TS, the description of goods is given only as a matter of convenience usings.

If to the commodity code on TN foreign trade activities TS precedes the pretext "from", it specifies that conditions and transactions in the third column are applied only to the goods which are classified in this goods item and are specified

in the second column. In this case it is necessary to be guided also by the description of goods.

1.2. If numbers of several goods items are provided in the first column or number of group and at the same time with it in the second column there is the generalized product description, the corresponding conditions and the transactions specified in the third column, are applied to all products classified according to TN foreign trade activities TS in goods items, specified in the first column, or to any of the goods items specified in the first column.

1.3. If concerning the part of the goods classified in the same goods item, one conditions and transactions are applied, and concerning another (others) the part (parts) other conditions and transactions are applied, in the second column there is the corresponding number of paragraphs, specific descriptions of the goods are provided in each of which, and respectively in the third column conditions and the transactions, falling into are specified to the goods which descriptions are provided in this or that paragraph of the second column.

Note 2:

2.1. The term "production" means accomplishment of any kinds of production or technological operations, including assembly or any special transactions. Thus it is necessary to mean provisions of the note 3.4.

2.2. The term "material" means any ingredients, raw materials, components, parts, etc., used for production of the product.

2.3. The term "product" means the made product even if it intends for further use in other production operations.

2.4. The term "goods" means both materials, and products.

2.5. The term "the state - the agreement party" means the state - the agreement party about creation of the free trade area from April 15, 1994 and the Protocol on modification and amendments in this Agreement from April 2, 1999.

2.6. The term "the third countries" means the states which are not agreement parties about creation of the free trade area from April 15, 1994 and the Protocol on modification and amendments in this Agreement from April 2, 1999.

Note 3:

3.1. Conditions and the transactions specified in the third column of these criteria of sufficient conversion of the goods, shall be performed only concerning used for production of the product of the materials which are not occurring from the territory of the states agreement parties (further - materials of the foreign origin). The restrictions determined by conditions and transactions in the third column, also extend only concerning used for production of the product of materials of the foreign origin.

3.2. If by conditions and transactions it is determined that in production of the product materials of any goods items can be used, it means that the materials classified in the same goods item, as the product, also can be used under condition

of keeping of special restrictions which can be determined by conditions and transactions.

3.3. If the product made of materials of the foreign origin, acquires the status of the events from the state agreement party where its conversion owing to change of the goods item or owing to the special condition falling into to the nem or transaction according to criteria is performed, and then is used as the material for production of other product, the condition and the transactions applied concerning the product in case of which production it is used, to it are not applied.

3.4. If concerning this or that product accomplishment of criteria of sufficient conversion of the goods is reached (if the rule of the ad valorem share) as a result of carrying out the transactions which are not answering to criteria of sufficient conversion of the goods is applied, this product will not be considered as the events from that country where these transactions took place.

3.5. Object of application of conditions and transactions is this or that product determined as independent object of classification according to rules of classification of the goods on TN foreign trade activities TS. In case of determination of the parentage of sets of the products, classified as such owing to the third ground rule of interpreting of TN foreign trade activities TS, the object of application of conditions and transactions surveys each separate element which is a part of the set.

Respectively:

the product consisting of group of elements or gathered from the series of parts and classified according to provisions TN foreign trade activities TS as the single goods, as a whole is surveyed as object of application of conditions and transactions;

if the batch consists of the identical products classified in the same goods item of TN foreign trade activities TS, each product shall be surveyed separately for the purposes of application of conditions and transactions;

if owing to the fifth ground rule of interpreting of TN foreign trade activities TS packaging is classified together with the products which were in it, packaging shall be surveyed as the component of the goods in case of determination of the parentage of these goods.

3.6. The product consisting of group of elements or gathered from the series of parts and classified according to rules of classification of the goods on TN foreign trade activities TS as the single goods, shall be surveyed as satisfying to conditions and transactions if all its components satisfy to such conditions and transactions.

If the part of components of this product satisfies, and the part does not satisfy to conditions and transactions or has the goods item identical with the finished stock, this product will be considered to satisfying conditions and transactions if cost of the components, not satisfying to conditions and transactions or with the goods item identical with the end product, does not exceed 15 % of the price of ex-works of the end product.

This rule can be applied in all cases, except for those goods for which in criteria other condition is specified.

Note 4:

4.1. Conditions and the transactions given in the third column of these criteria of sufficient conversion of the goods, establish the minimum amount of accomplishment of production or technological operations. Accomplishment of the established production or technological operations in smaller amount does not determine the parentage of the product.

4.2. If conditions and the transactions given in criteria of sufficient conversion of the goods, it is determined that the product can be made of more than one material, it means that one or more material can be used. Thus it is not obligatory, that all materials were used.

However, if within one condition or transaction there is any restriction established concerning one material, and at the same time with it there are other restrictions established concerning other materials, these restrictions are applied only concerning those materials which were really used in case of production of the product.

4.3. If conditions and the transactions given in the list, it is determined that the product shall be made of the certain material, it means that this condition is not the obstacle for use of other materials which owing to their nature cannot violate the situation of this condition or transaction. (For example: if conditions and transactions use of small crops or their derivatives special makes a reservation, it does not interfere with use of inorganic salts, chemical and other additives which are not made from small crops).

Appendix 6
to Rules by determination of the country
of origin of the goods,
registration, the certification
and issuing of the certificate of origin of the goods

Calculation of the share of local content in production of the goods

$$\text{SLC} = 100 \% - \frac{\text{Cost of foreign materials}}{\text{Cost of finished product.}} \times 100 \%$$

where,

SLC- the share of local content in the price of end products, %;

Cost of foreign materials - cost of raw materials and materials of the foreign origin;

Cost of finished product. - cost of finished product at the price "ex-works".

Appendix

to Resolution of the

Government of the Republic of Kazakhstan

No. 793 of 16 July 2014

**List of Certain Decisions of the Government of the Republic of Kazakhstan
which have been repealed**

1. Resolution of the Government of the Republic of Kazakhstan of 22 October 2009 No. 1647 "On Approval of Rules on Determination of the Country of Origin of the Goods, Registration and Issuing of the Examination Act on Origin of Goods and Registration, Certification and Issuing of the Certificate of origin of the Goods" (SAPP the Republic of Kazakhstan, 2009, No. 44, Art. 423).

2. Resolution of the Government of the Republic of Kazakhstan of 30 June 2010 No. 674 "On Amendments and Addenda to the Resolution of the Government of the Republic of Kazakhstan of 22 October 2009 No. 1647 and Recognition Certain Decisions of the Government of the Republic of Kazakhstan as Repealed" (SAPP of the Republic of Kazakhstan, 2010, No. 40, Art. 361).

3. Resolution of the Government of the Republic of Kazakhstan of 8 December 2011 No. 1497 "On Amendments and Addenda to the Resolution of the Government of the Republic of Kazakhstan of 22 October, 2009 No. 1647 "On Approval of Rules on Determination of the Country of Origin of the Goods, Registration and Issuing of the Examination Act on Origin of Goods and Registration, Certification and Issuing of the Certificate of origin of the Goods" (SAPP of the Republic of Kazakhstan, 2012, No. 7, Art. 137).

4. Resolution of the Government of the Republic of Kazakhstan of 29 December 2011 No. 1633 "On Determination of the Body (Organization) Authorized on Issue of the Certificate of Origin of the Goods for the Internal Circulation, and on Amendments in Certain Decisions of the Government of the Republic of Kazakhstan" (SAPP of the Republic of Kazakhstan, 2012, No. 11, Art. 219).

5. Resolution of the Government of the Republic of Kazakhstan of 18 January 18 No. 97 "On Amendments and Additions to the Resolution of the Government of the Republic of Kazakhstan of 22 October 2009 of No. 1647 "On Approval of Rules on Determination of the Country of Origin of the Goods, Registration and Issuing of the Examination Act on Origin of Goods and Registration, Certification and Issuing of the Certificate of origin of the Goods" (SAPP of the Republic of Kazakhstan, 2012, No. 26, Art. 355).

6. Resolution of the Government of the Republic of Kazakhstan of 26 June 2012 No. 843 "On Amendments and Additions to the Resolution of the

Government of the Republic of Kazakhstan of 22 October 2009 No. 1647 "On Approval of Rules on Determination of the Country of Origin of the Goods, Registration and Issuing of the Examination Act on Origin of Goods and Registration, Certification and Issuing of the Certificate of origin of the Goods" (SAPP of the Republic of Kazakhstan, 2012, No. 58, Art. 805).

7. Resolution of the Government of the Republic of Kazakhstan of 28 February 2013 No. 201 "On Amendments and Additions to the Resolution of the Government of the Republic of Kazakhstan of 22 October 2009 of No. 1647 "On Approval of Rules on Determination of the Country of Origin of the Goods, Registration and Issuing of the Examination Act on Origin of Goods and Registration, Certification and Issuing of the Certificate of origin of the Goods" (SAPP of the Republic of Kazakhstan, 2013, No. 18, Art. 314).
