

World Tourism Barometer

Statistical Annex

Volume 19 • Issue 3 • May 2021

The following pages contain detailed tables on tourism related indicators such as international tourist arrivals, international tourism receipts and expenditure collected by UNWTO from national institutions, as well as the International tourism in the Balance of Payments and the evaluation of UNWTO Panel of Tourism Experts.

Tables reflect yearly data and monthly or quarterly data currently available. Most data are preliminary and may be subject to revision. See the Methodological Notes at the end of this annex for further information on the data.

The tables on the following pages are not included in the free extract of the UNWTO World Tourism Barometer. The full document is available in electronic format for sale and free for UNWTO members and subscribers through the UNWTO elibrary at:

- English version: www.e-unwto.org/content/w83v37
- French version: www.e-unwto.org/content/t73863

Contents

- International Tourist Arrivals by (Sub)region and Outlook	A-3
- International Tourist Arrivals and Tourism Receipts (local currencies, constant prices), World and Regions	A-4
- International Tourist Arrivals by Destination (Top 50)	A-6
- International Tourism Receipts in US\$ (Top 50)	A-7
- International Tourism Receipts in euro (Top 50)	A-8
- International Tourism Expenditure in US\$ (Top 50)	A-9
- International Tourism Expenditure in euro (Top 50)	A-10
- Detailed tables by UNWTO regions and subregions: International Tourist Arrivals and Tourism Receipts	
• Europe	A-11
• Asia and the Pacific	A-13
• Americas	A-15
• Africa	A-17
• Middle East	A-19
- International tourism in the Balance of Payments (BOP)	A-21
- Evaluation of UNWTO Panel of Tourism Experts	A-22
- Methodological Notes	A-26

Explanation of abbreviations and symbols used

- * = provisional figure or data
- | = change of series or methodology
- .. = figure or data not (yet) available
- n/a = not applicable

mn = million (1,000,000)

bn = billion (1,000,000,000) [note in Spanish 'miles de millones']

trn = trillion (1,000,000,000,000) [note in Spanish 'billones']

- | | |
|---|------------------------------------|
| Q1 : January, February, March | T1 : From January to April |
| Q2 : April, May, June | T2 : From May to August |
| Q3 : July, August, September | T3 : From Sept. to December |
| Q4 : October, November, December | |

H1: from January to June **H2**: from July to December

YTD: Year-to-date refers to the change in the months with data available, compared to the same period of the previous year. The (sub)regional totals are approximations for the whole (sub)region based on trends in countries for which data is available.

Series of International Tourist Arrivals

TF: International tourist arrivals (ITA) at frontiers (excluding same-day visitors);

THS: ITA at hotels and similar establishments;

TCE: ITA at collective tourism establishments;

VF: International visitor arrivals at frontiers (tourists and same-day visitors);

NHS: Nights of international tourists in hotels and similar establishments;

NCE: Nights of international tourists in collective tourism establishments.

n Shaded rank numbers indicate an upward movement in the destination's place in the ranking over the previous year.

Series of International Tourism Receipts and Expenditure

All percentages are calculated from non-seasonally adjusted series in local currencies, unless otherwise indicated:

\$: in US dollars; € in euros; **sa**: seasonally-adjusted series.

For more on concepts, definitions and computation of data, please see the Methodological Notes on page A-26.

The World Tourism Organization (UNWTO) is the United Nations specialized agency mandated with the promotion of responsible, sustainable and universally accessible tourism.

UNWTO's membership includes 159 countries, 6 Associate Members, two Permanent Observers, and over 500 Affiliate Members representing the private sector, educational institutions, tourism associations and local tourism authorities.

About the UNWTO World Tourism Barometer

The *UNWTO World Tourism Barometer* is a publication of the World Tourism Organization (UNWTO) that monitors short-term tourism trends on a regular basis to provide global tourism stakeholders with up-to-date analysis on international tourism.

The information is updated several times a year and includes an analysis of the latest data on tourism destinations (inbound tourism) and source markets (outbound tourism). The Barometer also includes three times a year a Confidence Index based on the UNWTO Panel of Tourism Experts survey, which provides an evaluation of recent performance and short-term prospects on international tourism.

The UNWTO Secretariat wishes to express its gratitude to those who have contributed to the production of this *UNWTO World Tourism Barometer*, in particular to institutions that supplied data, and to the members of the UNWTO Panel of Tourism Experts for their valuable feedback and analysis.

This report was prepared by the **UNWTO Tourism Market Intelligence and Competitiveness Department**, under the supervision of Sandra Carvão, Chief of the Department. Authors include (in alphabetical order): Fernando Alonso, Michel Julian, and Javier Ruescas.

For more information including copies of previous issues, please visit: www.e-unwto.org/loi/wtobarometereng.

We welcome your comments and suggestions at barom@unwto.org.

Data collection for this issue was closed at the end of May 2021.

The next issue of the *UNWTO World Tourism Barometer* with more comprehensive results is scheduled to be published in July 2021.

Evaluation of UNWTO Panel of Tourism Experts

UNWTO Confidence Index: World

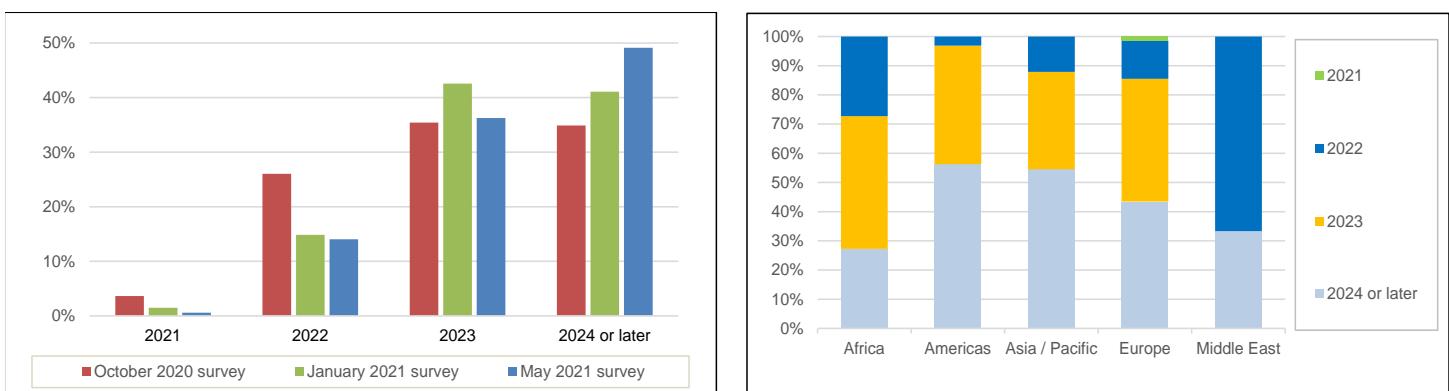

Source: World Tourism Organization (UNWTO) ©

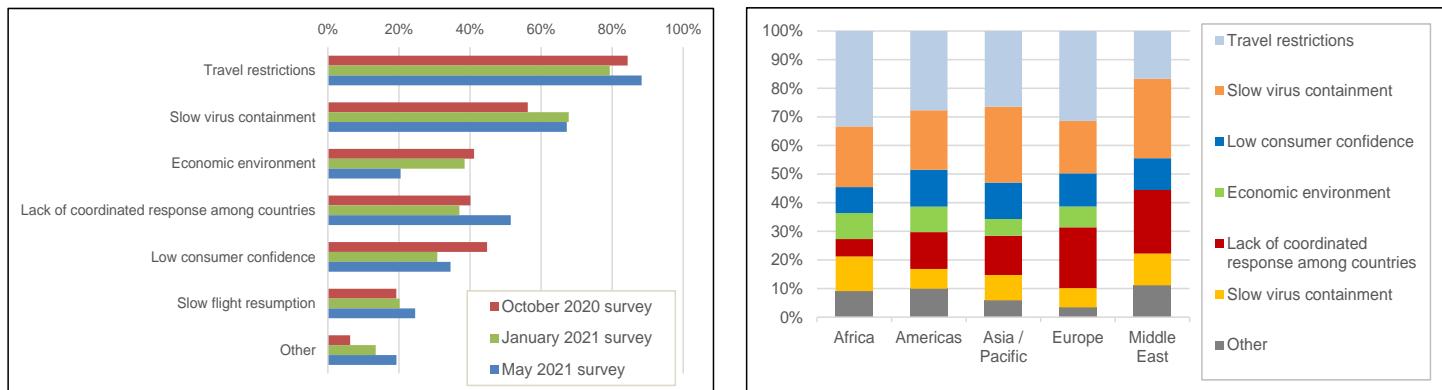

When do you expect a rebound in international tourism in your country?

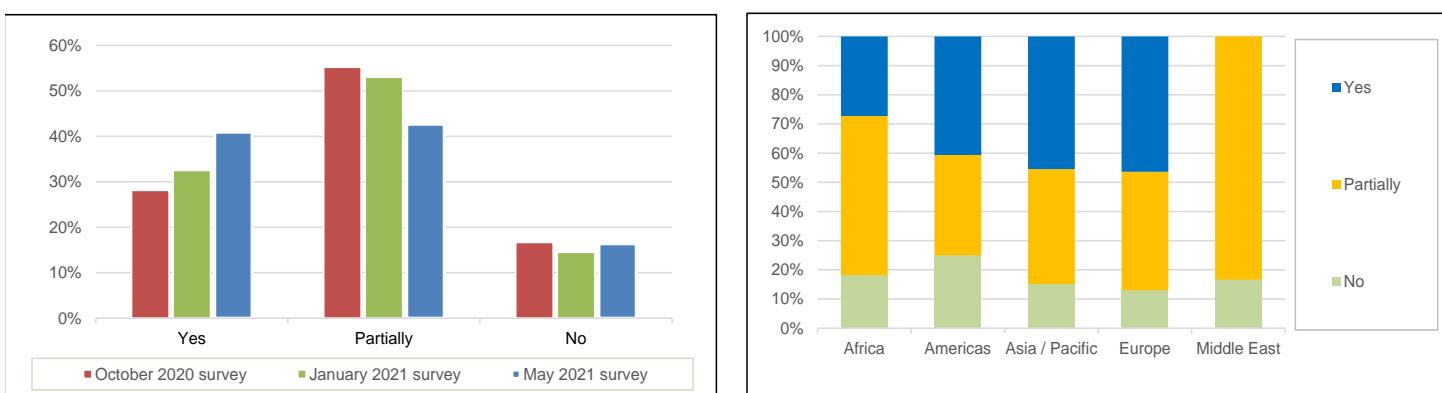

When do you expect international tourism to return to pre-pandemic 2019 levels in your country?

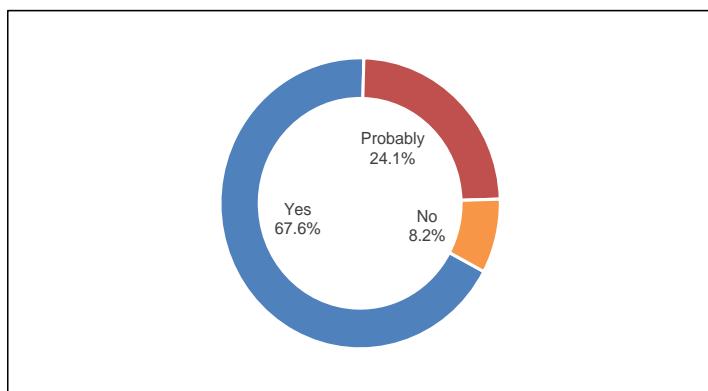

What are the main factors weighing on the recovery of international tourism?

Is domestic tourism driving the recovery in your destination?

Do you expect the vaccination rollout will contribute to the resumption of international tourism in 2021?

The UNWTO Tourism Confidence Index

The UNWTO *Tourism Confidence Index* is based on the results of an email survey conducted every four months since 2003 by the UNWTO Secretariat among a *Panel of Tourism Experts*.

The purpose of this survey is to collect opinions from tourism stakeholders worldwide regarding the performance of their destination/business in the last four months, and their expectations for the next four months.

Methodological summary

Questions on which the indicators are based:

- *What is your assessment of tourism performance in your destination or business for the four months just ended (or about to end) as against what you would reasonably expect for this time of year?*

[] much worse ; [] worse ; [] equal ; [] better ; [] much better

- *What are the tourism prospects of your destination or business in the coming four months compared with what you would reasonably expect for this time of year?*

[] much worse ; [] worse ; [] equal ; [] better ; [] much better

At the end of the year, the questionnaire includes two additional questions on the performance of the entire year and on the expectations of the coming year which feeds into the forecasts issued at the beginning of each year by UNWTO.

In addition, participants are also invited to include a qualitative assessment in their own words. The analysis contained in the *UNWTO World Tourism Barometer* is in large part based on their comments.

Use of responses for calculation of the indicators

In each survey Panel members are asked to rate both the performance of the previous four-month period and outlook for the coming four-month period on the following scale: much worse [0]; worse [50], equal [100]; better [150], much better [200]. The average of all replies then determines the confidence index. A value below 100 indicates a deterioration of performance, while a value above 100 represents an improvement.

Results are broken down by region and by sector of activity. These breakdowns should, however, be interpreted with caution as they may in some cases be based only on a relatively small number of responses.

Weighting of respondents' replies

There is no weighting. The score given by each respondent has the same weight, irrespective of the size of the destination or sector of activity.

Sample

The number of regular respondents to the Barometer surveys stands currently at close to 200, spread across all regions and sectors but it is not a representative sample. However, the UNWTO Secretariat's aim is to continuously expand and improve the Panel sample. Experts interested in participating in the survey are kindly invited to send an email to unwtopanel@unwto.org.

Calendar

This is an online survey conducted every four months, usually at the end of April, August and December, with responses collected over a period of 6 weeks, starting at the end of those months.

Publication of results

Results are usually published in January/February, May/June and September/October.

Methodological Notes

About the data

The monthly and quarterly statistics included in this issue have been compiled by the UNWTO Secretariat based on preliminary data reported by the institutions of the various countries and territories (e.g. National Tourism Authorities, Statistics Offices, Central Banks) through websites, news releases and bulletins, or provided through direct contacts with officials or through international organisations such as the Caribbean Tourism Organization (CTO), the European Travel Commission (ETC), Eurostat, the Pacific Asia Travel Association (PATA) or the South Pacific Tourism Organization (SPTO).

Information in this issue reflects data available at the time of publication. Data may be updated or revised without notice in future issues of the *UNWTO World Tourism Barometer* as it becomes available.

Countries that are not included, but which have monthly data at their disposal, are kindly requested to contact the UNWTO Secretariat at barom@unwto.org.

For major concepts, definitions and classifications in the measurement of tourism, please see the International Recommendations for Tourism Statistics 2008 (IRTS 2008) at www.unwto.org/methodology.

International Tourist Arrivals data

In the tables on International Tourist Arrivals for the various UNWTO regions, series are chosen that can serve as an indicator of trends in selected destinations.

The monthly series represented do not always coincide with the annual series usually reported for the various countries (e.g. visitor arrivals or nights instead of tourist arrivals) and sometimes only relate to a part of the total tourism flow (e.g. air traffic, specific entry points). See ‘Explanation of abbreviations and symbols used’ for more detailed information.

Regional and subregional totals are estimates by UNWTO based on the latest trends and available data for individual destinations.

Data on international tourist arrivals for France correspond to Metropolitan France.

Starting in the March 2021 issue, data on international tourist arrivals for the United Arab Emirates (UAE) corresponds to the entire UAE, not only Dubai.

Starting in this issue, all tables with monthly and quarterly data also include percentage change figures for 2021 over 2019, as well as the usual year-on-year change (over 2020). This responds to the need to provide data that can be compared to the pre-pandemic levels of 2019, and not just to

the unusually low levels of 2020, when tourism was severely impacted by the coronavirus pandemic and global lockdowns. Some growth figures for March 2021 and later months may seem strong compared to 2020, but in fact are weak when compared to 2019.

International Tourism Receipts and Expenditure data

For destination countries, receipts from international tourism count as exports in the balance of payments (travel) of each country and cover all transactions related to the consumption of goods and services by international visitors, such as accommodation, food and drink, fuel, domestic transport, entertainment, shopping, etc.

They include transactions generated by same-day as well as overnight visitors. Receipts from same-day visitors can be substantial, especially in the case of neighbouring countries where shopping accounts for a large amount of spending by cross-border, same-day visitors.

International tourism receipts (travel) do not include receipts from international passenger transport contracted from companies outside the travellers' countries of residence, which are reported in a separate category (passenger transport).

For the (sub)regional totals, estimates are made by UNWTO for countries that have not yet reported results, based on the previous year's value and the trend for the (sub)region. Unlike arrivals, where revisions generally more or less balance out, receipts data tends to be revised upwards.

It should be noted that data as reflected by UNWTO on international tourism receipts and expenditure for China is based on the balance of payments (BOP) travel credit and debit (as with other countries for reasons of consistency and international comparability) reported by the State Administration of Foreign Exchange (SAFE) at www.safe.gov.cn/en/BalanceofPayments/index.html.

In addition, according to the International Recommendations for Tourism Statistics 2008 (IRTS 2008), the balance of payments includes both business and personal purposes in the “travel” item. Business travel covers goods and services acquired by persons going abroad for all types of business activities. Personal travel covers goods and services acquired by persons going abroad for purposes other than business, such as vacations, participation in recreational and cultural activities, visits with friends and relations, pilgrimages, and education and health-related purposes. The “travel” item does not include international passenger transport, which is reported in a separate category in the BOP, under “transport”. For more information, please see the International Recommendations for Tourism Statistics 2008

(IRTS 2008) at: www.unwto.org/methodology and the IMF Balance of Payments and International Investment Position Manual (BPM6) at www.imf.org/external/pubs/ft/bop/2007/bopman6.htm.

It should also be noted that there is a difference in the data of UNWTO and those produced by the Ministry of Culture and Tourism of China (formerly the China National Tourism Administration) for 2014 and subsequent years.

Ranking of International Tourism Receipts and Expenditure

It should be noted that changes in the ranking of international tourism receipts not only reflect relative performance of the destinations, but also exchange rate fluctuations of the local currencies against the US dollar. Conversely, changes in the ranking of international tourism expenditure do not only reflect variations in spending on outbound travel, relative to other countries, but also changes in the value of the local currency compared to the US dollar.

In 2018 exchange rate movements were generally moderate, with the US dollar depreciating by 4% against the Euro. The US dollar-euro exchange rate moved from an average of 0.885 euro per US dollar in 2017 to 0.847 in 2018. Thus, the effect of converting tourism receipts earned in euros (by Euro area destinations) to US dollars was relatively small. The US dollar also depreciated by 3% against the UK pound and by 2% against the Chinese yuan and Japanese yen, among others. In these destinations tourism receipts expressed in US dollars were higher due to the exchange rates, though to a small extent. The US dollar however, did appreciate to different extents versus the currencies of large emerging markets, such as Brazil, Russia, and India, and quite sharply versus the Argentine peso due to the economic crisis in that country.

Exchange rates and inflation

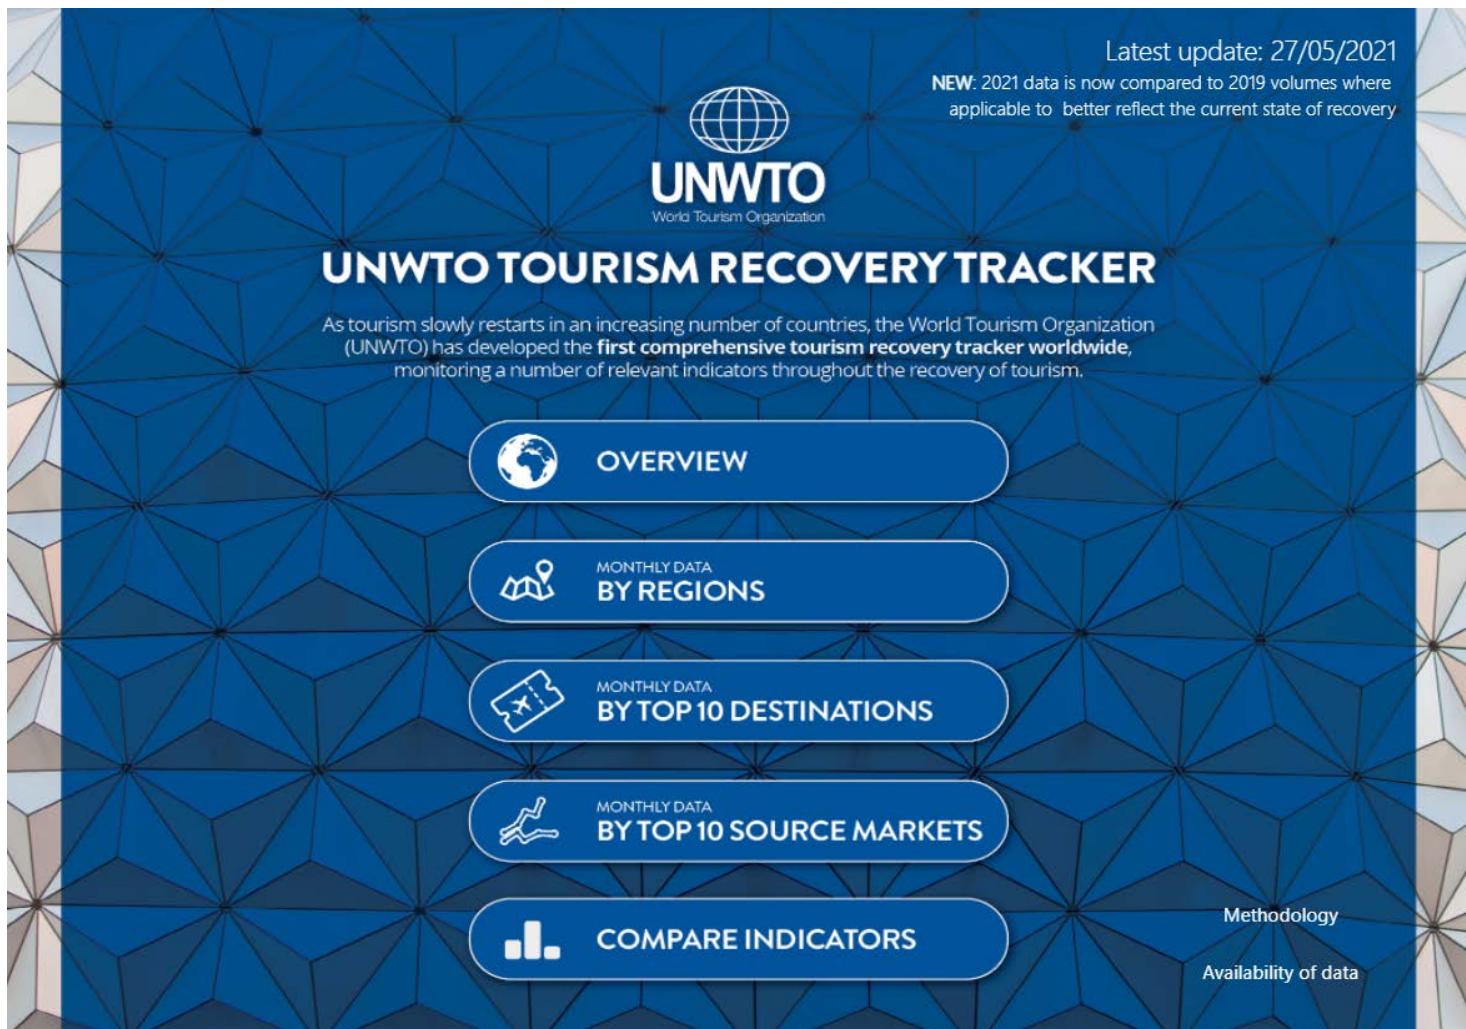

With financial data measured in different currencies it is complicated to accurately determine variations in relative terms, as receipts have to be expressed in a common currency like the US dollar or the euro and generally are also reported at current prices, thus not taking account of exchange rate fluctuations and inflation. Exchange rate changes can substantially influence the values in US dollars reported from year to year. When the dollar appreciates against for instance the euro, worldwide receipts expressed in dollars relatively decrease, and vice versa in the case the dollar depreciates.

Exchange rate US\$ to euro and vice versa, average for the year

Year	USD to EUR	Change (%)	EUR to USD	Change (%)
2010	0.7543	5.2	1.3257	-5.0
2011	0.7184	-4.8	1.3920	5.0
2012	0.7783	8.3	1.2848	-7.7
2013	0.7530	-3.3	1.3281	3.4
2014	0.7527	0.0	1.3285	0.0
2015	0.9013	19.7	1.1095	-16.5
2016	0.9034	0.2	1.1069	-0.2
2017	0.8852	-2.0	1.1297	2.1
2018	0.8467	-4.3	1.1810	4.5
2019	0.8933	5.5	1.1195	-5.2
2020	0.8755	-2.0	1.1422	2.0

Note: Exchange rates are yearly averages. Source: Compiled from Eurostat

In order to account for exchange rate changes and inflation, international tourism receipts expressed in US dollar values (for reason of comparison) were converted back to the local currencies of each destination, weighted by the share in the total, and deflated by the relevant rate of inflation.

The image shows the homepage of the UNWTO Tourism Recovery Tracker. The background features a blue and white geometric pattern resembling a globe or network. At the top right, it says "Latest update: 27/05/2021" and "NEW: 2021 data is now compared to 2019 volumes where applicable to better reflect the current state of recovery". The UNWTO logo is at the top center. Below it is the title "UNWTO TOURISM RECOVERY TRACKER". A subtext explains that tourism is slowly restarting and UNWTO has developed the "first comprehensive tourism recovery tracker worldwide", monitoring relevant indicators. There are five main sections with icons and titles: "OVERVIEW" (globe icon), "MONTHLY DATA BY REGIONS" (map pin icon), "MONTHLY DATA BY TOP 10 DESTINATIONS" (airplane ticket icon), "MONTHLY DATA BY TOP 10 SOURCE MARKETS" (airplane icon), and "COMPARE INDICATORS" (bar chart icon). On the right side, there are links for "Methodology" and "Availability of data".
