

# John Liddicoat

**John** is a senior research associate working on empirical methods and doctrinal aspects of IP law, often melding these approaches together to answer legal questions. He is generally interested in whether patent law meets its welfare-enhancing goal of accelerating the creation of new technology. He was the first senior research associate appointed in the Faculty of Law and specialises in issues at the intersection of life sciences and patent law, especially topics touching on genetic technology and drug development. His research has been funded by the Novo Nordisk Foundation, the Wellcome Trust and Cancer Research UK, amongst others. John publishes in a range of scientific and law journals, including *Nature Biotechnology*, *International Review of Intellectual Property and Competition Law*, *European Journal of Human Genetics* and *Annual Review of Genomics and Human Genetics*. John obtained his PhD from the University of Tasmania and his LLB (Hons) and BSc (Hons) from the University of Melbourne. He has also co-authored submissions to law reform committees in Australia and the UK and has given evidence on patent law reform to the Australian Senate.
