

Statement made by CHINA

Thanks chair!

China attaches high value to the topic of trade and women's economic empowerment and is willing to promote this topic to achieve concrete results in MC12.

China has actively participated in the drafting of the MC12 declaration.

It is hoped that the draft can be distributed soon.

China believes that today's meeting is a good starting point to discuss how to better help women participate in trade from the perspective of aid for trade, which should be reflected in the MC12 results.

Thanks!
